Thread: [Funny CS:GO Trick](#)

TRAUMA - October 16, 2015, 1:40 pm

I am sure a decent bit of you know this, but for the ones who don't..

Type this in chat: Any of you guys here about the CSGO smoking awarness thingy the devs added?

Chat: No____

You: Yeah, just type 'Quit Smoking' in console and it shows this chat thingy about what smoking does to you..

What it does // Makes the person leave the game.

It is supposed to sound dumb so people get curious.
At least 1 person does it per game.

Works with "demos" as well like say

Type 'demos' in console to see who is actually recording.
