Thread: [AMD Catalyst Control Center won't open](#)

?¢?????-???? - October 17, 2015, 4:54 pm

Hi,

I've just updated my amd drivers to the latest version 15.10 beta version and ever since I updated my drivers I cannot open up amd catalyst control center.

I tried installing the catalyst setup no luck.

Go back to the drivers you had previously.

I tried installing the catalyst setup no luck.

Try this, go to your start and type in "msconfig" press enter then go to startup and tick the box next to the Catalyst Control Centre. :P click ok and log off and on , or restart pc
