After waiting 3 months and getting no response from the vendor, I'm releasing this 0-day in the name of Specialists | Legends

Log2space – Internet Subscriber Management Software:

Quote:Log2space is an Advanced Next Generation Software used by Internet Service Providers for provisioning and management of their subscribers. It is used for complete management and control of all the attributes of different kinds of subscribers / customers.

Vulnerability:

PHP Code

<?php

Exploit Title: Log2space CMS | Administration Bypass

Exploit Author: mObile

Google Dork/s:

intext:"Powered by Spacecom Technologies Ltd."

intitle:"Log2Space Administration"

Date: 10/17/2015

Vendor: www.spacecom.co.in

Software: log2space

Tested on: Win7/Vista

Vulnerability Disclosure:

The vulnerability is located in the `username` and `password` input field values of the `login` module

.

Remote attackers are able to execute own sql commands by manipulation of the GET method request with the vulnerable username and password parameter.

The request method to inject the sql command is GET and the issue is located on the application-side of the online-service.

The sql vulnerability allows an attacker to remotely gain unauthorized access to the account system of the content management system.

Request Method(s):

[+] GET

Vulnerable Module(s):

[+] Login

Vulnerable Parameter(s):

[+] username

[+] password

Vulnerability Disclosure Timeline:

Quote:Username: '="or'

Password: '="or'

Enjoy! And thanks for viewing my thread. ?

TheUnknownPlague - October 17, 2015, 8:09 pm

cool thread i tested it and it worked idk what i can do with it though

Armada - October 17, 2015, 9:59 pm

Mother of Vulns, Beautiful ??

Cxdde3990xc - October 17, 2015, 10:21 pm

Nice find there!

Will check it out later

Thanks for this

murgan - November 6, 2015, 10:18 pm

It does not work now! \tried on 11 nov 2015

Aakash_Choudhary - November 6, 2015, 11:14 pm

Nice thread but not working now :(

xx 0x0 xx - November 7, 2015, 2:15 am

it's still working with me :D

ShopifyExpert - November 7, 2015, 8:38 am

thanks for this dope 0-day exploit tutorial!

Ch4Nc3113r - November 13, 2015, 9:25 am

It still work with me.bw Can you upload shell in these sites?

saadmrB - June 1, 2016, 6:26 am

that working , thanks you

L?YLE - *June 2, 2016, 1:01 am*

nice exploit, but it's not a 0day :p
