Thread: [Md5HashKill - Free MD5 Cracker - Made In Python](#)

Lambasoft - October 18, 2015, 8:11 am

Greetings,

It has been a while since I last published anything, I've been busy with university and projects ...

Anyhow, I'm glad to present my new Python tool, MD5HashKill.

Md5HashKill allows you to input MD5 hashes and search for their decrypted states in online databases, basically, it's a MD5 cracker / decryption tool.

Currently it only supports <http://hashkiller.co.uk/> database, which is more than enough, but still, I'll be adding more databases soon. And will even add google's database.

ScreenShots:

You can check the tool on GitHub:

<https://github.com/lambasoft/Md5HashKill>

Please check my [BLOG](#) as well for further details or to review.

Thanks a lot mate, it means a lot.

Please post your review once you try it.

Added Screenshots, hopefully to give an idea on how the software works.

Looks very nice and will definitely try it out when I come home.

Thanks for releasing this :)

Thanks for releasing this :)
Thanks a lot?
Please let me know once you try it :)
