What is the air-speed velocity of an unladen swallow? 11 meters per second... Holy shit that is fast.

I have spent alot of time on this forum, I feel like there are still boundaries that are set for l33t members... I would like to have full access to the forums and different privilege's, I want to make something for myself on this forum. Who knows where i'll go. I plan on setting up a business no one has ever seen on hack forums. That's the goal.

What contributions have i made to hackforums?

What is the air-speed velocity of an unladen swallow? 11 meters per second as google says it.

Why do you deserve to be upgraded? I have been upgraded to l33t recently by a fellow HF member actress, It's been a honour for me, I like to help members around the forum, I try to be active and HQ, also because I would love to enjoy the awesome features that ub3r comes with.

What contributions have you made to the forum? From my point of view, I haven't made anything that can be called real deal, instead I have helped many people through the tech field, I try to review ebooks and leave a accurate remark on it, it's the best I can do for now, I would like to have more and more places where I can help, I like pming with users, I am friendly and kind :)

I am not good with rap
I can't even make a lap
I see people get stabbed
I can't wait to take a nap
I got some things stock
lets meet each other at dock
besure to door your lock
ultimately i dont give a fock.

I am not good at poems xD

Spoiler ([Click to View](#))

On every face in the market
the dust of the city
is etched in summer heat.
Behind the stands
the wrinkled old women
know many things:
 The ripeness of fruit,
 the weight of eggs.
Their baskets measure time
both bought and sold,
woven and rewoven
in the language of trade.

It is time . . . for dreams.

Thanks for reading, have a good day sir!
