Thread: [Downtime?](#)

?lex - October 18, 2015, 2:10 pm

I don't know if it's just me, but I've been facing a lot of HF downtimes recently. Is it happening to me only, or everyone sees this?

I remember back in the day, I didn't have this problem..

OG-SB - October 18, 2015, 2:11 pm

Yes Hackforums Having Slow loading sometimes, just wait for Owners response regarding this issue.

Wires - October 18, 2015, 2:12 pm

How did you manage to miss the sticky and post this thread?

I didn't miss the sticky, I read it, but it's been happening a lot lately, that's why I posted this thread.

It's probably because Omniscient is testing servers or doing some behind the scenes work that may slow down HF for a while. I am willing to bet my money that these slow times are directly related to the future server changes etc.

(Oct 18, 2015 03:48 PM)- Sam - Wrote: [\[CITE\]](#) Just be patient and await the new upcoming changes. I'm looking forward to the changes, and I would imagine many others are also.

On a side note, omni mentioned in that sticky Wires link that PM are being junked. So I suggest saving your PMs if you need them.

[Server Move and Changes](#) by [Omniscient](#)

The forums should expect some additional downtime due to the move and we can assume that with the move there will be some small glitches. This will cause any additional downtime. I know this from experience. Just be patient and the forums will be back to normal soon.

^

There will be a server move within the next few days, if the site seems down for you, just stick with it and reload in a few minutes. We're almost there.

Omniscient - *October 18, 2015, 10:24 pm*

Some attacks, some server problems, some additional work causing heavy load, and we're also reaching our current server limitations.

All reasons why we'll be on new hardware this week.
