Thread: [HF Mobile - Mobile Theme for HF](#)

_wind - October 18, 2015, 6:25 pm

Over the past month, I've been secretly working on a project, HF Mobile. Here it is, ready to present to y'all!

Screenshots:

[Imgur album](#)

Features:Dark Theme

Menubar for easier navigation

Custom pages for home, PM, thread display, profile, and more

Infiniscroll

Pretty PMs

Not Working:User CP

Bitcoin & Skype embeds

Install

Install process is pretty complicated, steps for iOS and Android are listed below:

Android ([Click to View](#))

In Google Play, search for [Dolphin Browser](#), and install it.

You'll also need to install [Tampermonkey for Dolphin](#), which can also be found in the Play Store.

Open Dolphin Browser and navigate to this link: [HERE](#)

Press "Install this Script", a popup will appear to verify. Click yes.

Go back, and click on the link to HF Infiniscroll in the description, or click here: [LINK](#)

Go to HF, click the profile icon in the top right, and login.

For a better experience, click the puzzle tab in the top right of Dolphin, and select fullscreen as an option.

Done!

iOS(jailbroken required) ([Click to View](#))

Open up Cydia, and install this repo: <http://apt.thebigboss.org/repofiles/cydia>

Install the tweak called: "Userscripts Loader". You will need to respring your device after.

Copy this URL: <https://greasyfork.org/scripts/13187-hf-mobile/code/HF%20Mobile.user.js>

Go to the Userscripts Loader pane in your settings application. You need to access this pane and enable the tweak via the toggle button. After doing so, click on the Applications link.

Toggle the browsers you want to use it on

Go back to the Applications pane and click 'Download URL'. Paste the URL in and install it.

Go back to your browser and copy this URL:

<https://greasyfork.org/scripts/13188-hf-infiniscroll/code/HF%20Infiniscroll.user.js>

Go back to Settings > Userscripts Loader > Applications > Download URL, and paste the URL in again. Install it.

Run your browser, go to <https://hackforums.net>, login and you should be good to go.

Roger Waters - October 19, 2015, 5:59 am

Been waiting a long time for something like this. Managed to play around with it on my computer and will be trying to get this working on my phone.

Burakku Kenshi - October 19, 2015, 6:00 am

Holy Shit.

I'm installing this right now. If it's as good as I hope it is I will jizz in my pants.

St?Ik?r - October 19, 2015, 6:02 am

Looks nice just because my name is there ?

SIM-2830142 - October 19, 2015, 6:05 am

Getting this now, looks sick as hell!

Obviously good job!

RelationShit - October 19, 2015, 6:40 am

Won't infini scroll make page loading slower?
Especially on slower internet?

Reason I'm avoiding this atm

Edit: infinite scroll is a different file, nevermind.

Hash G. - October 19, 2015, 7:34 am

I was currently doing one, but yours is much better. Thanks for your work.
Wearing the sig, because why not.

_wind - October 19, 2015, 10:00 pm

(Oct 19, 2015 10:32 AM)xadamxk Wrote: [\[CITE\]](#) Have you tested the mobile iOS script on chrome?
I keep getting the undefined error that is a result from using a library or function that mobile browsers don't like. Is there a specific browser that this works for?

Regardless, an awesome script.

Edit: how do you quote a post?

No, sorry, I don't have an iOS device that I could test it on. I'm pretty sure it has something to do with the XMLHttpRequest function that I'm using with Grease Monkey, if anyone knows a work around on that, that would greatly help.

Tyranus. - October 19, 2015, 10:01 pm

Very HQ, planning on getting this as soon as I get my new phone :D

??? ??? - October 19, 2015, 10:02 pm

Thanks alot for this will download :)

problems.x - October 19, 2015, 10:04 pm

Omg yes will be getting this soon, will help so much thanks polunom!

0x - - October 19, 2015, 10:31 pm

Sometime this week, I am going to attempt to make a better iOS Version that doesn't require a jailbreak. I'm often on HF on my iPhone and I hate using the web theme of HF on mobile and my device isn't jailbreak so I cannot use this userscript.

Packets395 - October 19, 2015, 11:24 pm

Look quite interesting, I shall give it a try. Good job OP.

Grim - October 19, 2015, 11:26 pm

Niccolò Machiavelli - October 24, 2015, 10:36 pm

Unfortunately it's not updated for the iOS9 jailbreak, but cool either way!

Ninetales. - October 26, 2015, 2:44 pm
can't get it working on iOS 8 either.

FRANKIE - October 26, 2015, 2:45 pm
Mother fucker! This is awesome

Lithe - October 26, 2015, 2:49 pm
Posting for later, haven't read it yet but I'm going out. Sounds really cool though!

Other than being a bit slow (The full site loads followed by the userscript) it's actually really great. At first I couldn't find out how to get to other parts of the forum, so I'd advise that you put either an arrow or some other indicator next to the "Common" button so that users are able to see that it's actually clickable (I thought it was just text at first).

I'm not entirely sure how to make the userscript load before the full page since Code @run-at document-start doesn't seem to work when I change it.

Edit: Yeah Code @run-at document-start follows two different rules for GreaseMonkey and Tampermonkey

GreaseMonkey: The script will run before any document begins loading, thus before any scripts run or images load.

TamperMonkey: The script will be injected as fast as possible.

The Dev says that it's a limitation of Chrome caused by this:
<https://code.google.com/p/chromium/issues/detail?id=63979>, I wonder if he'd be able to alter the Dolphin version of Tampermonkey to fix this. In all honesty it's not a big deal at all. I just like everything to look and run smooth. :P

Malthael - October 26, 2015, 10:34 pm
Gosh this is awesome! Going to try it now on my phone :D

Jason Stattham - October 27, 2015, 7:12 am
Nice!

Only thing that i hate, is that the mobile theme loads so slow..

Code_Spent - October 30, 2015, 9:57 am
Very nice! It looks very clean and native, did you use Cordova or build from scratch? I'd be interested in learning more about how you did this!

Hampton Brandon - December 3, 2015, 10:38 am
Saw this on your sig, got to say this is dope. Hopefully you can get the iOS version going good.

I'll be sure to get it and recommend it then.?

Transporter007 - December 16, 2015, 5:04 am
Nice release. I hope you can release iOS app without jailbroken device.

Cookie® - December 16, 2015, 8:16 am
A official HF app should be made! :)

BI?c?OuT - December 17, 2015, 10:28 am

Nice relase , thanks man :)

Ta-kun - December 24, 2015, 7:23 pm

This is fucking awesome man! Glad to see someone posting shit worth looking at.

_wind - December 25, 2015, 3:02 pm

Hi all, sorry for not releasing many updates recently.

Once I've finished some projects that I've been working on, I'll try to make this into a mobile app :)

woahxx - December 25, 2015, 3:13 pm

Just tried it, looks good - will not use as primary tho

?Syria - December 30, 2015, 8:59 pm

Nice! BTW can you make User CP work?

Frenzied - January 3, 2016, 4:42 pm

OMG I FUCKING LOVE YOU <3333

Spooky White - January 17, 2016, 1:17 am

Shit this looks sweet, never knew there was such thing. Anyways sucks I need a jail broken device which I don't have.

Nads - January 17, 2016, 1:22 am

Cannot wait to try this, looks pretty nice mate. Thanks for this.

Æ†µ™ - January 18, 2016, 7:19 am

Looks awesome. Will there be any iOS updates in the future that dont require a jailbreak?

Nick (Name) - February 2, 2016, 3:48 pm

This no longer works with iOS 9.0.2, I've tried on safari and chrome. This doesn't work sadly :(

YourNotMyDad - February 2, 2016, 3:49 pm

Been waiting, Thanks for building this OP

Gonna use this daily.

Viagra - February 2, 2016, 3:51 pm

I should try this out soon!

Angel - February 2, 2016, 3:54 pm

it's beautiful [img]http://izismile.com/engine/data/emoticons/35.gif[/img]

holy fuck lmao first time seeing that emote

moritezza - April 24, 2016, 12:06 am

why you not submit it to App Store? i have no Jailbreak, are you tried for add it to app store?

+1 for this project.

NeedCoffee - April 24, 2016, 6:20 am

Good work dude !

Thanks you very much for releasing this for free !

I will give you some positive rep as soon as I'm upgaded :)

Cleveland Cavaliers - June 3, 2016, 9:23 am

Damn thats dope! Wish I was jailbroken. I might need to find out if I can Jailbreak on my version, haven't updated in a while.

Stashyy - June 3, 2016, 9:25 am

The the theme looks great, going to test it on my phone later.

Thanks for making it man.

Lexxi. - June 3, 2016, 9:28 am

this is so damn dope, was just thinking of wish we had / was able to have a app or something, but this does the trick :D, very nice OP!

Fish - June 4, 2016, 9:10 pm

thanks for the script OP! HF is a pain to use while im on my phone so this will help me out a lot! im gonna be installing it right now :D

Wilmer - August 8, 2016, 11:29 pm

Great work OP! Can't believe I just now found this.
