Made an .edu account and got it in 1 hour.

@People complaining, just shut up and let him sell his ebook. Pretty sure some of you can't take the fact he's selling it for cheap so others won't make profit selling single .edu e-mails.

A few points about the e-book: The e-book is well written so even someone with 0% brain capacity can follow it.

If you can't follow the e-book, you should throw yourself away.

Cons: Next time use a better font mate, and not bold.

Put some more space between every step. (Oct 21, 2015 10:46 AM)FRANKIE Wrote: [\[CITE\]](#) Vouch this works like a charm.

This isn't the Maricopia method, which has been patched/doesn't work.

If you have any vouch copys available I will leave a detailed review.

I'd love to review this ebook and obtain a vouch copy to make the community aware of what they are

purchasing. Let me know if I can do that.

I don't believe it will, not at-least anytime soon. My opinion of it anyway.

So, just because you said to buy the method giving a thorough review we are all just supposed to jump off our asses and throw our money at the OP? He gave you a vouch copy for a reason, don't be an asshole. Would you want someone to do this to you?

topdog77 - October 20, 2015, 7:50 pm

Couldnt you just buy .edu accounts off of someone selling them for like 0.10-0.25 a piece?

\$10 would mean you'd want to create like 40+ .edu email accounts...? I'm not sure what someone could possibly need 40-50+ for I could understand 5-10.

Do you mind explaining potential uses for these accounts to me? Amazon student & all that would be pointless since I could just buy a .edu account for 0.25 then use it once and never use it again :O(and that 0.25 would set me up good for 6 months-4 years lol).

Lowest I've seen is \$3.50

Thank you for answering him, lol. Please check your PM as well sir. ?

Thanks guys, please ignore the rep of "shitty eBook". User hasn't even bought the method nor did I give him a vouch copy.

I love how I've sent this to 4-5 people to review/vouch copies and not a single person actually has left one. And people wonder why sellers never give copies out anymore.

Thank you for the actual review man, I haven't wrote many eBooks so I'm still a basic starter on it. I will find a better font and take the bold off. I also am spacing it out now as we speak and it will be updated on the auto buy.

Thanks again man!

Also, thread updated with a nice design and auto buy. If anyone wants to purchase all you have to do is click the autobuy.

If anyone purchased this last night and was having problems, please let me know. I just did the method and it worked. I will be updating the eBook in a bit with more images to hopefully help more.

I've also lowered the price for the weekend, instead of doing a "promo code".

Price will go back up to original price on Monday.

Classified's Review
Ease Of Use-The format of the ebook directly correlates with the steps in the process in which the formation of the email is created with. With pictures in some steps the book is clearly articulated and presents the user with full knowledge prior to making the account.

Understanding Book-At some points the steps do crossover but then again I like to assume the steps are just reinforcing the material.

Grammar-The grammar does get messed up at certain points however the instructions do not get lost.

Other-More pictures would make this ebook over the top however the steps and instructions listed get the job done just as well. The tip was only to help the visual learners, such as myself.

I would recommend this ebook for the following perks:

Autodesk (Lots of software)
RipTiger (Software)
DiskAid (Software)
Dropbox* (Double Referral Storage)
LastPass (Software/Online App - 6-month)

This seems like it has a lot of potential to become quite a successful ebook in the community. I'm not normally into e-books nor do I normally review/purchase them but I may be looking into this soon. It seems great. Good luck with sales.

I see all these "money making" schemes but this method is beyond easy and there's plenty of cash left to be made from selling email's. :D ?

Closing this thread now guys, sorry.
