Thread: [\[Showcase\] OQ.MineBot - a new minecraft bot.](#)

OnlyQubes - October 21, 2015, 9:32 am

Hello fellow hf users.

I will soon™ be releasing my new minecraft bot. It is coded in c# and required .NET 4.5.2 framework. So i just wanted to show it to you guys. This is my first time posting something like this on hf.

Spoiler [\(Click to View\)](#)

[Video: <http://www.youtube.com/watch?v=oUMbC7Pbcb8>]

I am only allowed to post 1 video on hf, so here are some more video links:

<http://www.youtube.com/watch?v=Rsdq7uosJqU> << Web service showcase

<http://www.youtube.com/watch?v=D6M8tXlpJTk> << Macro showcase #1

<http://www.youtube.com/watch?v=WpxsHttzseU> << Macro showcase #2

http://www.youtube.com/watch?v=r_OKz7ltmrw << Some random spamming

<http://www.youtube.com/watch?v=CwoLEZWp23c> << Kit dropping

Currently the bot is quite buggy, so i'm planning on fixing all the bugs and releasing it then.

Things you need to know about the beta/vouch copy:

- This thing has probably a lot of bugs that i haven't found, you will help me find them.
- Bugs that you will find should be reported to my email or to a discord channel. (you will get them if i choose you)

- I will try to add all the features that you thing are necessary.

To apply to the beta/vouch copy (PM me/Post in the thread) (only 'trusted' members are able to participate):

- Do you have any alts?
- Can you port forward the port 8080 (for the web stuff testing)?
- Can you record?
- Your pc specs (optional)

Btw tell me if you would be interested in buying this thing guys :).

(Might be even selling the source for the right price :p)

to OP:

Looks very capable. It's nice to see something like this made outside of forge/liteloader. What do you plan doing with this?

I am planning on selling it or maybe if people don't find interest in it just releasing it for free. Also i am hoping to let people create their own scripts with the macro thingy. Like i have made a few 'macros' for specific servers that login with an account, join a faction drop items (into hoppers or player inv), leave fac and repeat with other accounts. So basically i want to allow people to create their own custom scripts with this and use them for item production/spamming.

Edit: Edited the post to contain normal images and normal video links :)

Thanks : ^)You're welcome. This is exiting.

I have an idea for a PVP bot, but would rather explain in private if possible.

SavageAF - October 21, 2015, 10:01 am

When it's finished I want a vouch copy lol, this looks real nice so far

Thank you :P. It should be out in a few days and i will be giving away a few vouch copies :)

AppleNooby - October 21, 2015, 1:45 pm

This looks really nice OP well done.

fleckzter - October 21, 2015, 1:57 pm

this looks pretty fucking cool, it would be cool if you could make this do something with pvp

Thanks. Yes you can import an alt list or if you are joining a cracked server just import a list with
usernames.

I will be doing some beta testing very soon, so that will be my vouch copy thing. I will be choosing
2-3 maybe more people to participate in it and report bugs and test this ting.

- Added more information about the beta/vouch copies to the thread!

Vouch, bought this product works perfectly. Very good program with an even better seller. I highly
recommend this program for all your server spamming needs!

This user is awesome, i have been speeking to him for quite a while now and he is very nice. Thank
you for the vouch.
<3

Seeing as nobody wanted to be a tester on this site i found a few people that are testing the bot.
The bot is now functional and can be used with very little crashes.

I will be opening a new sales thread, but for now you can buy the bot by pming me or replying to
this thread! (10\$)

PVCK - October 26, 2015, 8:13 pm
I'd be willing to pay upwards of \$25 if this bot porks. Please add me on skype: heresokids

I'm back :)

Can't edit the post! Read below:

There are no more vouch copies left, I already found 3 testers, but thank you for your pms!
