Thread: [VCW problems with solutions.](#)

IAmNoOne™ - October 21, 2015, 9:51 am

hi

these days many guys are having problem with vcw's
and i helped out many via teamviewer ?
i am created this thread only for those who are having
problems and searching for solutions.

dont know how to disbale hardware acceleration?

1.go to www.chatroulette.com then

click on profile and settings>audio and video>webcam and mic access permissosns>uncheck enable
hardware acceleration.[Click me for pictures](#) ?

#Problem no.1.closes instantly.

- 1.Install flash player in every browser.
 - 2.download adobe standalone flash player. [click me.](#)
 - 3.disable hardware acceleration in all browsers
 - 4.restart your browsers.
- and now you are good to go. ?

#Problem no.2 white screen

- 1.Update your flash players and shockwave flayer.
- 2.disable hardware acceleration in all browsers

you are done ?

now start ewhoring and make some cash ?

If you are still having problems.

PM me(i'll help you via teamviewer) ?

Add a tutorial on how to disable hardware accelerator. Many of the newbies won't be able to find it.
Also, add how to properly run a VCW.

Many people still try to run it in conventional way, i.e. opening it in firefox browser.???

Ronaldo. - October 21, 2015, 11:25 am

Hope this thread can help the newbies which are having problem with VCW.

Thanks for your efforts. I am sure people will make good use of this thread.

James Burnham - October 22, 2015, 6:48 am

It is really useful info, it would be nice though if you would create a nicer layout!
