Thread: [\[TUT\] Semi-bot for Addmefast.com | Gain points faster for social media use |](#)

Wide Awake - October 22, 2015, 9:23 am

I'm going to teach you how to use Addmefast.com faster and better!

This is a semi bot tutorial, meaning you will still need to put in your time/effort for this. At least it's not 100% of it :)

Addmefast is a social service. You get points by liking, following. Waste the points on the same thing.

-----What you will need-----

1. Imacro

- [Chrome Extension](#)

- [Firefox Extension](#)

- [IE Extension](#)

2. An account on addmefast.

-Ref link: <http://addmf.co/?2TAU1XB>

-Non ref link: <http://addmefast.com/>

3. Instagram Account (I would use a fake one)

4. iMacro Code:

Code VERSION BUILD=8340723 RECORDER=CR

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5

URL GOTO=http://addmefast.com/free_points/instagram

TAG POS=1 TYPE=DIV ATTR=TXT:Follow

WAIT SECONDS = 5-----

-----Writting Tutorial-----

1. Once you have imacro, open it and create a new macro. To create a new macro just click the record tab -> record macro then stop. A box should appear with a few text.

2. Delete all that and paste the imacro code i have provided you in there. Click save.

3. Log in to addmefast.com
4. Click on the play tab -> Play Macro.
5. Everytime a windows pop up all you need to do it hit follow and close. (faster by clicking Alt + F4)
6. A new window should pop up, repeat step 5.

-----Video Tutorial-----

[Video: <https://www.youtube.com/watch?v=egplBrTAVwU>]

-----Please note-----

- THIS IS NOT A FULL BOT!

- You can change the wait time, just replace 5 on the code with any other number. (Usually depends on your internet speed)

- You can also copy and paste the same code more than once in the imacro so you can go on for a longer period of time.

- I wish i was an expert in this, but i'm not. This is a very simple and basic macro that you can create on your own. I tried making a full 100% bot but it just wouldn't detect the popups -_-

Any questions let me know :)

In 51 seconds i gained 32 points. Not to shabby :)

Dang it may not be a full bot but it does generate points really quick. Great post OP and nice thread layout just overall a HQ thread.

Thanks man! Since this tut won't last long i figured do a basic thread layout. But yeah it is a way faster method!
