Thread: [Link Bypass and Direct Download Link Generator PHP Script](#)

Bollywood - October 23, 2015, 8:51 am

Hey guys, Few days back my friend sent me this script. Today I was going to delete it but thought I should post it here, maybe somebody would find it useful.

What does this script do?

1. ByPasses adf.ly, #, sht.io, linkshrink, minidroid, p.pw, goo.gl, bitly, mylinkgen etc links.
2. Generates YouTube, Facebook Video, Vimeo, Dailymotion videos download links.
3. Generates Google Play apps download links.
4. Generate direct download links of Usersfiles, Userscloud, Savefile.co, Speedyshare, Elsfile, Zxcfiles, Acefiles, Aisfile, Sendspace, Sharemods, Mp4upload, Verzend, Idup.in, Mega.co.nz, Tusfiles, Mediafire, Hugefiles, 1fichier, 4Shared, Indowebster, Uploading, Filepost, FileFactory, Oboom, Mirrorcreator, Datafilehost, 2Shared, SoundCloud
5. I don't remember!!!!

Note:

This script uses another website to generate links, but visitors would never know that. ?

A staff member should junk or close this thread before it gets filled with more leechers begging for this script. OP is exiled, I don't understand how they don't understand that, it's not rocket science.
