Thread: [| Anti Memory Scanner - Powerful USG - RunTime Bypass - Digital Signer](#)

RagZorro - October 24, 2015, 4:50 am

Sales Thread has been paused

Lovesosa - October 24, 2015, 4:51 am

interesting i am looking for an crypter and il keep this in mind.

Raymond Reddington - October 24, 2015, 4:53 am

Vouch for Ragzorro. He always produces quality stuff.

DamienVC - October 24, 2015, 6:48 am

Vouch for RagZorro, always trusted.

Inj3ct0r? - October 24, 2015, 6:49 am

This looks good. Sexy thread design.

N3oNight - October 24, 2015, 7:45 am

finally you released the crypter we were talking about.

Also I think you must post on the thread it .net , as it will help you to avoid confusion with buyers.
any ways best of luck with sales.

Brother Mouzone - October 24, 2015, 8:45 am

Huge VOUCH for RagZorro. Everything he does is quality. Don't hesitate to deal.

GLWS!

The Anonymous - October 24, 2015, 9:16 am

Looks like really good crypter. Good luck with the sales.

Bjorn Lothbrok - October 24, 2015, 11:42 am

Huge Vouch for Ragzorro, Great Person.

pseudomethylamin - October 24, 2015, 12:53 pm

I like RagZorro, always very helpful and know what he is doing. Huge Vouch, you can trust him as im nearly using his support and services since 1 year.

©**Ratatouille™** - October 24, 2015, 9:24 pm

Hello man

Any vouch copy available ?

You need vidéo bypass or tutorial ?

Good luck

Mace - October 25, 2015, 4:26 am

I vouch for Ragzorro, it's a very nice crypter, don't hesitate to buy it.

RagZorro - October 29, 2015, 5:26 pm

Thanks.

Scan and Run time results:

[img]<http://www.refud.me/results/9aafup3zfxbo8v6hozo6cts7t0orrwzlspm.png>[/img]

Cibor - October 29, 2015, 5:53 pm

nCrypt3r is a great product, and RagZorro is trustworthy seller.

Stellen Sie TT - October 30, 2015, 8:05 am

Hi man, It sure seems this is what we're looking for.

However any vouch copy? Apart from .NET is it coded in C++?

Does it support Luminosity Link + Hawkeye Keylogger?

Do you have a lifetime sales + private stub?

RagZorro - August 15, 2016, 2:52 pm

Project has been completely recoded.

Sale is resumed!

30 SLOTS LIMITED ONLY. Vouch Copies has been given out so do not ask for.

mehtevass - August 15, 2016, 2:56 pm
vouch !

awesome product !saw the coder working at it.

SIM-2303144 - August 16, 2016, 5:24 am
<http://prntscr.com/c6e2ww>

proof of USG :)

<https://www.pscan.xyz/results.php?id=fKNROMGqFWCwsbpS>

Demoralise - August 17, 2016, 1:55 am

Oh fuck! This actually could be very good. RagZorro is a GREAT developer.

8.28% similarity is actually quite high...

Expensive but most likely very good.

SIM-2303144 - August 19, 2016, 5:44 am

UAC bypass add
real bypass
not Registry edit
add video soon

drewkasp - August 19, 2016, 3:22 pm

Keeping an eye, will hope for good sales if the runtime is good.

0x0F0C - August 20, 2016, 6:39 am

what exactly you mean by "fake API and DLL" ?

+

what this coded in?

EDIT:it seems a good crypter
good luck with ur sells bro

info1965 - August 20, 2016, 3:19 pm

Can this work on a botnet? Native files.....facts and not stories. How long is fud , what is fud on run time?

MauiBoi - August 20, 2016, 4:40 pm

(Aug 20, 2016 03:19 PM)info1965 Wrote: [\[CITE\]](#) Can this work on a botnet? Native files.....facts and not stories. How long is fud , what is fud on run time?
^^^ this.

RagZorro - August 21, 2016, 1:16 am

Native support will be added very soon. Keep eyes open will update You in here.

Bypassing MSE

[Video: <https://www.youtube.com/watch?v=2g8kQFNzN7g>]

lacroix - August 21, 2016, 9:53 am

what are the extension available in this crypter. i mean like

.exe
.scr
.com
.pif

kauf - August 21, 2016, 10:58 pm

what is your crypter coded in? and you said it does not support native file at the moment? By the way, does this bypass nod32, kaspersky both scantime and runtime? i have seen alot of fake advert yet not worth the buy. and if someone has proof of this before owner respond kindly share not much information on the crypter.

SIM-2303144 - August 23, 2016, 4:18 pm

nice shit!

SIM-2303144 - September 2, 2016, 7:51 am

Crypter Updated With loader system

output can be 3 extensions

1 - *.js

2 - *.vbs

3 - *.exe

Current Scan result :

<https://scan.majyx.net/scans/result/670584094349a58d8bf23306bd40968156819eb1>

the same file Well Scan every day (proof MD5 of file)

klash hacker - September 2, 2016, 8:36 am

I vouch RagZorro

Unique methods for crypt

your Crypter is the most advanced crypter i have seen on HF

GLWS

#Exploit - September 2, 2016, 10:06 am

Huge Vouch for NullCrypt3r, Very strong and %100 FUD. I really surprised with the methods it uses.

Highly recommended !

Regards

SIM-2303144 - September 3, 2016, 5:34 am

today scan same file

Universe_X - September 3, 2016, 10:18 am

Looks promising but can you please add a file binder to it?

RagZorro - September 3, 2016, 1:37 pm

Avast bypassing

[Video: <https://www.youtube.com/watch?v=KI8EqqVkTuk>]

From now Crypted file can be saved as.js

.vbs

.exe

Demoralise - September 4, 2016, 1:59 am

This crypter appears to use the same icon randomisation as Mercana Crypter by Wardow. I find that to be a little fascinating...

SIM-2303144 - September 4, 2016, 6:35 am

scan result of today same file?

yeswecandoit22331 - September 4, 2016, 10:16 am

Hi Rag

your crypter look really promising.

Does it have "hidden startup" function please ?

balrog - September 5, 2016, 7:56 am

Already bought. Will post my review on this product in the next few days.

balrog - September 9, 2016, 8:42 am

Waiting on update seller says he's working on.

RagZorro - September 13, 2016, 9:50 am

Big updates coming soon - registry protect, startup value unable to deleting, file unable deleting, Binder unlimited + Native support.

Your license will be extended extra 15 days!

lck.paid - September 15, 2016, 9:22 am

<http://prntscr.com/cid8lg>

how do I get my 15 days?

Null - April 6, 2017, 3:26 pm

This crypter was clearly meant for me....

Good luck with sales, looks nice :)

Computerjul - April 6, 2017, 11:57 pm

Hey,

i like his protector it has useful features the usg is really good, FUD and good execution. Folder protection is also very strong.. i was not able to delete the installation folder without third-party software. The digital signer does also work very good but i am not quiet sure what it is good for :)

Best regards

SubAtomicShop - April 8, 2017, 3:00 pm

It is a beautiful crypter! definitely worth the money, all the features work perfectly and ragzorro even took the time to answer all my questions and offer me even more support on top of everything, great guy, great crypter, cant really get better than that.

RagZorro - April 13, 2017, 1:20 pm

MesutÖzil - May 12, 2017, 6:21 pm

Does it support # RAT??

Guccitive - May 13, 2017, 1:40 pm

Stuck on

Rename Random, i also tried Char as ReNamer but it still doesn't crypt and stays endless on 'Rename Random'

Fix?

RagZorro - May 14, 2017, 2:33 pm

(May 12, 2017 06:21 PM)MesutÖzil Wrote: [\[CITE\]](#) Does it support # RAT??

Yes it does

EPS Tech - May 19, 2017, 11:42 pm

Regarding Digital signer, what is the advantage?

Guccitive - May 20, 2017, 8:08 am

The issue with stuck at Rename Random was an issue on my side.

For people that are looking for a good & fud crypter this is most likely your best choice. Why? Because it's easy to use and the features are hot as fuck.

I rate 10 / 10.

Thank you for the crypter.

longdusboub - May 22, 2017, 10:07 am

Just received my copy and after one or two test crypts , i decide to give my feedback , because after almost 10 years of malware usage , i just assume i bought a ton of crappy software

As i use netwire , we can call it a HQ rat , i would to invest in a high quality product and the choice wasn't really easy as i do not had real feedbacks....

so i decided to give a chance to NullCrypt3r , regarding all his features it seemed to be perfectly what i needed

Once installed , i ran the software and holy mother of God , the crypter seems awesome but maybe quite difficult to understand all the features , that was just the first sight after the first tests everything becomes logical and well thought

First of all the crypter have a high compatibility with most of the malwares sold here (many sellers claims they have a high compatibility when they don't) with nullcrypt3r , no problem , i can use it with my 2 rats , netwire and njrat

Regarding the features now , i finally find a real and efficient startup , once again everything is well designed

the injection feature is also awesome , native or net , the best choice will be automatically selected , thing that will help many people who don't really know the best one to choose

The binder feature is also absolutely great , even if this is not the biggest revolution , this feature , in my opinion is totally needed in a crypter

What to say about the awesome USG(unique Stub Generator)? this feature will ensure you with a very smart implemented method to get unique crypts each time you will use the product and that makes the difference

But that is not all the digital signer , another very well thought features will ensure you the best FUD results possible and the list of amazing options and features continues , with the fake dll , fake apis , fake resource

i did not talk about a product like that for years (and trust me when i say i bought a lot) , i was looking for something designed with quality , getting great results with no bullshits only here to sell more products and i find it

Nullcrypt3r is totally and even more what it is described on this sales thread , a very HQ crypter for people knowing what they want by a developer knowing what he does

nothing less , nothing more , it worth every single dollar
Best regards

RagZorro - May 23, 2017, 4:06 pm

(May 19, 2017 11:42 PM)perez Wrote: [\[CITE\]](#) Regarding Digital signer, what is the advantage?
Digital Signer assigns digital signature of the app you want into crypted file.

SubAtomicShop - July 3, 2017, 2:34 pm

So! I have been a user of NullCrypt3r for almost 3 months.

I use this crypter daily and I will confidently say that this is the best crypter on HF. without a doubt. It's so good infact, that I have bought a 6 month subscription a few days ago as soon as my subscription was about to end.

Crypters I have used: Data Protector, RATA Protector, Spartan, Flow Crypter, Static Crypt and many more.

This crypter is FUD with each frequent stub update, the USG is powerful and generates a highly unique stub on each crypt, but the most impressive part is that each crypt bypasses just about every single major antivirus I have put it up against.

These include: AVAST free/Premier 2017, AVG, Kaspersky Total Security, NOD32 Antivirus/ESET Smart Security Premium, McAfee VirusScan, 360 Total Security, Malwarebytes, IOBIT Malware Scanner, Microsoft Security Essentials Windows Defender, and many more.

Here are some clips of the crypter in action, including the settings I personally use.

NJRAT SETTINGS (in the RAT STUB BUILDER settings some RATS require that you disable startup and installation including persistence, these methods are detected and cause errors)
<http://recordit.co/xE8HWEeURR>

NullCrypt3r SETTINGS AND CRYPTING PROCESS
<http://recordit.co/nyxwnN3eo6>

AVAST RUNTIME PROOF (if you understand how difficult it is to bypass AVAST runtime including deepscreen then you know the quality of this crypter.)
<http://recordit.co/1r6AYKrjNI>

RECENT SCAN
<http://prntscr.com/fr92oc>

NOTES: 16 second delay is my own personal choice, this is optional and your own time can be chosen, Always look into your antivirus settings if you are doing continous scans and tests and disable community sharing, sample sharing, or anything similar, you dont need samples to be sent for analysis, ofcourse do not scan on virustotal and instead, use non distribution scanners like nosharescanner.com (free) or sign up at viruscheckmate.com (paid) or xcscan.com (paid, 1 free daily scan.)

Yes I know my virtual machine is slow, but it does the job ;)

Will be adding more runtime videos when I clean up space on my HD and have a day off work.

Thanks for this amazing crypter.

boco111 - July 4, 2017, 12:30 am

When creating a build, the object reference is not set to an instance of the object. An error occurs.

Nivettez - July 4, 2017, 3:22 am

Came back just to say thanks.

This is certainly one if not the best crypter available on HF marketplace.

Persistence of injected .NET is just too mad.

Good luck, OP and keep up the updates!

breaker1911 - July 5, 2017, 5:41 am

Gonna review this crypter soon, right after i've some freetime.

G3yb01 - July 7, 2017, 12:40 pm

Thank you sir, exceletent program, perfect for protecting files :D

EPS Tech - July 19, 2017, 2:25 am

Left you a PM, kindly check and reply..

nasseraleguern - July 22, 2017, 11:44 am

Hello,

I just bought nullcrypt, but it's impossible to open it so I would like to know why and how to open it.
cordially

Nassera

? [\$(1000)\$] ? - July 23, 2017, 9:55 am

Will be purchasing after update!

My favorite crypter at the moment!

EPS Tech - July 23, 2017, 4:30 pm

Well, had access issues after purchase and OP came to my rescue to point me to the right direction.

To be honest, I had doubts initially but after running some tests I discovered there are few crypters 'if any' that can match nullcrypt3r. GUI looks awesome, USG engine is something else, execution is simply smooth. Well, words alone cannot discribe it, and EVERYONE WHO GAVE THEIR OPINION about this crypter are 100% correct!!!! ??

chikwadoca - July 26, 2017, 2:45 am

I will like to know how good NullCrypter will crypt netwire. The current crypter I am using for my netwire crypt FUD at crypt time, but before 7hrs it will be 6/. How good is this crypter at runtime??

RagZorro - August 3, 2017, 5:16 am

(Jul 26, 2017 02:45 AM)chikwadoca Wrote: [\[CITE\]](#) I will like to know how good NullCrypter will crypt netwire. The current crypter I am using for my netwire crypt FUD at crypt time, but before 7hrs it will be 6/. How good is this crypter at runtime??

NullCrypt3r is compatible with netwire

Hello Good People and users of NullCrypter please i am in urgent need of assistance as i seem not to get hold of OP at the moment am using # RAT when i crypt i disable all setup on the RAT and enable on crypter but i keep getting an error message that says RTC Stopped working and the crypted file will refuse to execute.

Here is a screen shot from the error message i keep getting : <http://prntscr.com/gciop9>

i tested on 2 different systems and this is the same error messages i get , please i do not want to use any other crypter because i know Nullcrypter is the best i just need guideline and assistance if am probably doing something wrong or not doing something right on the crypter

Thank You.

kent0o - August 31, 2017, 7:28 am

@Kingin001

I am also experiencing similar problem with NullCrypter with my # server, but my was only not responsive (Not connecting). Op tried to help on TV with no success and he took my servers to do some tests. So I think he is currently working on it. As for my other server (Netwire) crypter is working flawlessly.
