Thread: [Is it possible to downgrade OS without external device?](#)

sxui - October 25, 2015, 2:17 am

I'm on Windows 10 and want to downgrade to Windows 7 but I don't have a USB/CD. I have the ISO for Windows 7 already downloaded, is this possible?

Davy - October 25, 2015, 2:09 pm

I would recommend you just get an USB..

Yeah, this is what I plan on doing today. Cheers.

Yes it is possible.

- 1.) Create a partition on your drive
- 2.) Move the ISO to the partition
- 3.) Install EasyBCD
- 4.) In EasyBCD: Add New Entry > ISO > Select the ISO. Mode: Load from Memory (Less than 8GB of ram? Run from Disk)
- 5.) Reboot

You should be greeted with a selection screen, choose the second option to boot to the ISO, follow the install procedure as you normally would.

Don't delete the partition the ISO is contained on until you have installed Windows 7.

I've tried this and it says I'm in UEFI mode when I try use EasyBCD, and I can't be bothered going through the BIOS to change it. I'll just use a USB later.
