Thread: [How to send a live pic via kik on jailbroken iPhone?](#)

**RainbowBanana** - October 26, 2015, 10:26 am

Hey guys, just started ewhoring on mobile and I got a jailbroken iPhone how do I send fake live pics via kik? What app do I need or cydia tweak? Need answer ASAP :)

Download KikCameraSender and when you will open kik,you will open the gallery and you will see a new "slide" which you will slide and activate the tweak.

By the way,try the K8 tweak,it's also useful.

Does this work via iOS 9 phones?

KikCameraSender is the one that works for me, a little buggy but it works.  
Kik Camera Gallery is another one that people use.  
Kik8, and Kik Messenger Essentials are ones you could try as well.
