Thread: [Hijacker v0.2](#)

Edge of Nowhere - October 26, 2015, 4:35 pm

v0.1:

<https://hackforums.net/showthread.php?tid=5030108>

About Hijacker:

Hijacker is a command-line application that allows you to hijack the execution of one program, to make it execute another.

v0.2 Preview:

[Video: <https://www.youtube.com/watch?v=Rh85mF92mUo>]

Changelog:

- Added "/l" command to list current hijacks.
- Fixed a bug that prevented a hijack from being uninstalled.
- Changed the UI a bit.

Install:

/i <File name to hijack> <Path to payload>

Uninstall:

/u <File name to hijack>

List hijacks:

/l

Examples:

Hijacker /i notepad.exe C:\Windows\System32\calc.exe

Hijacker /u notepad.exe

Hijacker /l

WARNING:

/u may cause problems if you don't know how to use.

If you're wondering what the 1/35 is, this does modify certain portions in Windows for it to work.

kmz22222 - October 27, 2015, 6:20 am

Vouches! thanks for the share extremely helpful.

May i get the coding of the program please?

And i wonder if you can change the download site because i can't run mega.

edit:srsly? i opened the program and nothing happened.

Check the video in the first post (<https://hackforums.net/showthread.php?tid=5030108>). It shows you how to use it. If you just double-click (since it's a command line application), it will not show. You got to do as in the video.

In case you can't find the video (it's for v0.1, but, you can see the changelog to see what's been added), here it is.

Still have absoulutely no idea how to open it.

EDIT: Just knew how to do it! thanks for that.

Gotta try it and see if it works. if it works gotta give a huge thanks tho+ make a tut on dat.

ASLR - October 27, 2015, 2:17 pm

I don't plan to test it, but mind telling us how it works?

kmz22222 - October 27, 2015, 2:22 pm

EDIT EDIT EDIT :D

It fucking works like a charm.

Please i want the coding QQ

Lemme sexplain this to you.

Basically its a CMD Written code changd into a program
when you open it you can make a program excute another
like

if you want you can make it like that:

when you open calculator it opens notepad.

Such anti calculator :D

More info&shits would be found at my tut <https://hackforums.net/showthread.php?tid=5036925>

HiddenEyE - *October 29, 2015, 12:24 am*

used it and it is cool, thanks for the share
