Chubs™ aka badman - October 27, 2015, 6:50 am

That is absolutely amazing! I'd love if you could make me something for my background on PC.

I'm very busy these days. I have a lot of clients and projects to finish.

Maybe next time ?

Thank you.

Barneyyz™ - October 27, 2015, 2:36 pm

Looks great, I totally dig it. Loving your work with the flares, they work perfectly.

IceRolex - October 27, 2015, 2:45 pm

That looks dope man, honestly it looks like a movie preview cover that I see at cinema's.

?inimalist - October 27, 2015, 4:53 pm

Thanks you all guys!

This photo finished around 15 minutes if I remember right.

Thanks! ?

Without the text is too empty. Thank you btw ;)

gnarly. - October 28, 2015, 3:36 am

face doesn't really look like it's in the helm, just rubbed out around the edges and stuck there like a faded sticker.

the little stringy bit from the original photo also annoys me lol.

stratex - October 28, 2015, 4:06 am

Damn dude, this is great stuff!

Real nice comp mate.

Only thing I could say is there's a little too much stars then. Maybe tone it down just a little bit. Or just the big ones.

And the astronaut render looks a little stretched or probably just that not high quality.

Anyways, really good. Like the colors.

Mad_Max_ - October 31, 2015, 12:05 pm

Very nice photoshopping. Very nice indeed

glasscanstudios - October 31, 2015, 11:16 pm

I like that a lot, looks very cool and creative.

?MIN?M - November 1, 2015, 3:22 am

looks awesome! If I wasn't sexist i'd give it a 10/10, but since it's a female it's a 8/10. Females can't be astronauts, they have vaginas lol.

VermHF - November 1, 2015, 3:24 am

Wow, that's amazing.

You should make graphics tutorials, if you haven't already.

I would love to learn how to make stuff like this. :P

Master Beta - November 1, 2015, 7:05 am

looks great. would make an awesome movie poster

As you can see my resources, you don't need more than maximum 20 minutes for that :)

Its not something special but looks very cool from 3 wallpapers :)

Schnitzel - November 1, 2015, 8:47 am

It looks great but the helmet is looking too wide and not really fitting her face.

Bleep - November 1, 2015, 8:49 am

It looks really good. I'd love to have this as an avatar!

Sacred Symmetry - November 1, 2015, 8:53 am

EightBit - November 5, 2015, 12:57 pm

I would really appreciate a speed-art video of you creating a piece of GFX. I absolutely love this GFX artwork.

I would rate you /10 but that's not a sufficient enough integer for you.
100/100.

OMARATION - November 5, 2015, 1:01 pm

They are pretty high quality, that's probably why.

Take my word for it - they look awesome.
