Thread: [just finished my ewhoring bot, earned \\$1000 one day](#)

thebignasty - October 29, 2015, 8:09 am

Hi guys,

I really hate to brag about my work, but this time i am feeling like I can share some information. I finished my ewhoring bot (NO, its not for sale, ill keep it private) and just ewhore(d) 10 guys with it. Made total of \$1000 for 3-4 hours of work.

I spent last 3 days on that bot and i'm very proud of it and the fact that i was able to return my investment (time is money you know).

Thats it for me.

Regulus - October 29, 2015, 8:10 am

Damn that's awesome man. Got any proof of the money? :)

Sure you did.

Proof please or this stuff never happened

Optimized - October 29, 2015, 8:15 am

I highly doubt this is true by any sorts.

First off I would like to point out you seem around 13 and unable to acquire skills to code such a bot, although a some-what simple task. Secondly I highly doubt you obtained a bot that was able to make \$1000 referring back to my previous point you do not seem skilled by any sorts in the programming or coding world, so making an AI based program with the skill to be human-enough to manipulate 10 guys out of \$1000 is mere impossible for someone such as your self.

Also referring to Grievous' link to a post you made.

@Grievous:Its not like selling "mentor-ship" to others :P :P :P, but did you notice that i have a personal and a business paypal accounts. Hopefully you understand that European PayPals have ~2500 euros (or ~\$2700-2800) yearly limits.

If i complain about the last \$180 (\$160), think about the rest of the money and you'll understand.

No guys, im not going to brag anymore, and its not about the money, but the fact that i created something useful. I tried many times before, but the best was a Counter-Strike hack many years ago (i even made it to some reputable CS hacks websites). Another project was "Google Rank Improver" but it was not so profitable.

Once again its not about the money, its about the fact that i did something and now it pays back to me.

Also referring to Grievous' link to a post you made. Yes, you and Grievous do a pretty nice job selling sands to kids (excuse me mentor-ship services), its the bragging section here and i can brag on whatever i want. And you're not the one who has the right to comment on my coding skills, because i have an assembly programmer right here next to me. The guy even has his own language, not to mention that he is a member of reputable European hackers group.

Better shut your mount and keep selling your "services" to those kids.

Most of the posts on bragging section are semi-legit, this is why its the bragging section. Hopefully you don't live under the impression that someone will come here and share its method in great details. or show you a detail screenshots/stream from his/her bank accounts or something. Obviously ewhoring is illegal, money laundering too.

You sound rather upset because I pull more guap than you and can show proof of it. ?

thebignasty - October 29, 2015, 8:29 am

@Grievous:

If you notice the guys told me that its not possible, i solved it in 1 hour with the help of the right guy! Actually it took me 50 minutes to found the guy and 10 minutes to him to help me with the code. I did the main part, the guy fixed the rest for me.

P.S. Its not the ewhoring section and don't worry, i already said its private, your shitty mentorship services are safe, i won't compete with you. I'm not like you "guys" to brag around only with one purpose: to sell something shitty to others.

I already mentioned in the first post and i'm proud of my work and thats it. Thats it. I don't need to teach others for money, when i have a private working method. Believe me or not, i don't give a shit, i only care about the money i can earn.

Its like a Mercedes. You already have a solid base and you need someone to put the AMG package or something. But even without the AMG its still a Mercedes.

SO the guy helped me with the code and after that i was good to continue on my own.

The customers are from my private website i found some time ago, its unsaturated.

I'm not willing to share more info sorry. As i said i don't have a sales thread and i don't plan to sell my things on hf, so i don't to fool the kids. IMO most of the guys here because that if you have l33t and 100+ in reputation, you should be the man, but actually its only kids game. I have some friends in Russia, they even don't participate in forums like this, but they are involved into carding and something called "paypal bill me later". Maybe i'm not legit enough because i don't have l33t with 100+ in reputation and some "sands" sales thread (paid sticky).

Obviously some guys earn good amount of money selling their "ewhoring services" to others and when i said that i earned \$1000 + ewhoring, it brings attention. They're very worried that someone can steal their clients. Nah, i'm not interested sorry.It was not the purpose of my thread, you're safe.

Couldn't you handle ten guys on your own? Didn't say it was fully auto-pilot. The bot just helped me too weed out indians and so on, and i was also able to create a "voice verification" thing.

Also double drip 3 of them.

Maybe its my fault its not your typical ewhoring bot like the customer say "Hi", the bot replies "Hello, whats up", its more like DOX, verification thing.

Should i mention that I also injected some of my customers with LuminosityLink - NO :P :P :P

Just don't compare age and skills, you don't know how old the people out there are, that are doing unbelievable things from their computer.

OP: That's nice if you're actually making it. I personally don't like eWhoring, and wouldn't do it even if I had a bot like yours. (Bc I have other methods ofc)

I already said that I don't have plans to sell my method or bot mr. Scumbag, so you can continue to sell your "ewhoring mentoring services" based on your fake earnings.

Its the bragging section and if you don't believe me, feel free to get away from my thread. I'm not here to sell anything to anyone, don't be so bad @Grievous that someone can have real earnings and no need to post fake screenshots like you does. I guess that if you only have a chance to look at one of my paypal account you will piss in your pants!

But as i said, im not here for this kinds of kids games!

By the way earned \$2000 from bitcoin exchange rate. I bough bitcoins when the bitcoin was around \$160 (i actually bought them for \$200), but sold them for \$400.

AnonymousBuffalo - November 6, 2015, 1:07 pm

@thebignasty

Do you have any proof let me guess no.

Anyway even if you did code the bot which is highly unlikely as a proper ewhore bot would take more then 3 days to code for multiple reasons

and even ask anyone it can take years of experience to code a bot that can first manipulate 10 guys and answer all of there questions and all that shit. I see that you have some VB knowledge h@ckforums.net/showthread.php?tid=5036394(sorry for the @ replace with a) though I do not believe you can create such a bot in VB (maybe with .net but i dont really know as im not a .net or vb guy) and even if you paid someone to make such a bot you can't say YOU made the bot. Also ">Escalates situation by harassing me and trying to defame" this just proofs that your a fake a person who did code the bot wouldn't escalate the situation he would let it be. @Anonymous Now you can't underestimate people for there age you can underestimate thebignasty as we can all see his a fake though some 13 could really have the knowledge to code such a complex bot.

First off you tell us that you have a verfied business paypal. And then you tell us it's limited to 2,7K
