What is Doxing?

Doxing is about to get an information about someone!

whatever you get that information by one of those things:

-IP Address [80% effective, in my opinion its the best way to dox]

-Email [Not very effective,Useful in getting the victim's social account]

-Home/Street Address [Shitty,Almost won't work with you]

-Phone number [You may not get anything from that,Bad way]

-Name [There is 7 billion people in earth,The chances are extremely low to make a site/tool or
whatever to determine the person you are looking for]

=====

First i want to introduce to you, my collection of doxing sites!

i suggest using <http://www.whitepages.com>

OR: <https://pipl.com/> and <http://www.spokeo.com> [Good with email doxing]

What about doxing with ip address?

What i do.

1-Get their ip via an IP Logger [Vbooter.org 's ip logger is good]

2-Use the ip tools at www.whatismyip.com

3-Use infosniper.net or any other geoip site to get location

That's what i usually do to get the info i want.

but if i want to get even more, i have lots of sites.

Make sure that you must see the link of vbooter NOT google link.

so before you go to google you should see a random link which you shouldn't be able to see because this is not ip logger.

The best troll for that is encrypting the ip logger link with a TINYURL.COM and make the ip logger redirect them to a forum or their website and say:
OH LOOK SOMEONE IS COPYING YOUR THINGS
They will definitely click on the ip logger.
