Insight Recruitment Thread

What makes us different from other groups?

We are a very well organised group. We intend to import a system to make sure all our members will be active. We also intend to do a sort of "Mentoring" if you wish to call it. Every member recruited will have to teach at least 1 thing to all the other members in one session together, call it like school if you wish. You may think why are we doing this, well we are doing this so that all our members benefit from each other and you put in work to receive information, rather than being spoon-fed.

How old are you?: 17

What timezone are you in?: Central USA

What are your skills?: I specialize in Cyber Security & Penetration Testing. Although, I spend most of my time assisting users in the RAT section. I have multiple past experiences with Hosting companies support department which has helped me learn more than I ever believed in Support & Teaching. I'm also currently learning C#.

What are you interested in learning about?: I'm interested in learning more about Coding & Marketing.

Will you represent us in an HQ fashion?: Of course, nothing but the best.

Do you use Skype and/or TeamSpeak?: Yes, both.

Are you willing to do a fair amount of Hw? Yes.

Do you have a mic? Yes, great quality.

List some notable threads? [\[FREE\] Nullen's RAT Consulting](#) | [FREE MENTOR](#) | [DNS & PORT-Forward & Stub Buildin](#)

How can you benefit the group? I can bring my knowledge and experience with Remote Administrative Tools to the table. I'm a calm, relaxed, and patient mentor. I believe we all start somewhere, the the future member's knowledge depends on the teaching that is provided.

Are you willing to help out with group projects? Yes, I'm online around 8 hours a day.

Why should you take one of the last few slots? I believe that my advanced knowledge in certain subjects would deem useful to many members. I've had past experience with teaching many users, and I truly wish to help as many as possible.

What timezone are you in?: Central

What are your skills?: website security

What are you interested in learning about?: marketing, coding, account jacking, basically anything to expand my knowledge and that I could potentially monetize. May change.

Will you represent us in an HQ fashion?: I always strive for professionalism

Do you use Skype and/or TeamSpeak?: skype.

Are you willing to do a fair amount of Hw? Sure

Do you have a mic? Yup.

List some notable threads? <https://hackforums.net/showthread.php?tid=5037348>

How can you benefit the group? Can help people newer to the hacking scene, I can assist people and help do some favors. I can do anything you need me to help you with.

Are you willing to help out with group projects? Yep!

Why should you take one of the last few slots? Because I don't know enough and I'm not satisfied."The greatest enemy of knowledge is not ignorance, it is the illusion of knowledge." I want to learn but also understand things and apply them. I also believe that "Knowledge is power. Power to do evil...or power to do good. Power itself is not evil. So knowledge itself is not evil." Basically, I want to learn and develop a great mind that can accomplish/over one anything it's challenged with.

Quite a few are left, the reason you along with others were fired is because of inactivity.

There have been quite a few (and will still be) activity checks.

Users that failed them were removed from the group.

Hinch was closed due to advertising.

He advertised the forum used by this group which is not allowed.

What are your skills?: Most shit in beginner hacking section nah let's be honest, that shit was like 2011, we all move on, Web exploitation (Still learning), information gathering, dox0ring, networking

(studying my degree, stuff like TCP/IP, Cisco, OSI model, setting networks up, windows server 2012 management + more), currently learning more in hosting (got my own VPS to practice, probably more, just cannot think.

What are you interested in learning about?: Mainly web security, wouldn't mind teaching people about networking.

Will you represent us in an HQ fashion?: Sure, why not.

Do you use Skype and/or TeamSpeak?: I can talk on Teamspeak, Skype is the devil... but I can expand if needed.

Are you willing to do a fair amount of Homework? Yeah why not... but I still have to put my time into university too - doesn't mean I will be inactive, though.

Do you have a mic? Roger

List some notable threads? None, currently writing a "private investigations" ebook, you can have a vouch copy when it's done if you like.

How can you benefit the group? As well as learning from you guys, I can also contribute my own knowledge and in the future progress to teach what I have learned.

Are you willing to help out with group projects? Most certainly, helping is my specialty.

Why should you take one of the last few slots? Well, I may seem like another guy with low posts, only just signed up, but I also signed up to this website to learn more on my studies as well as contribution for everyone helping. I am a very helpful and I see my self as a very trust-worthy guy. I think I can contribute and help in the group which will hopefully have an uprising advantage in the future. I am easy to get along with, and have good communication skills and love team work effort project - always love to contribute in them. I'd like to consider my English to be standard, meaning when I am teaching / learning, I don't act like an absolute fucking brainless annoying retard... ain't nobody got time fo' dat!

Also, does Curiositas make me leet as fuck, that takes some mad skill.

HF UID: 2914245

How old are you:15

What time zone are you in: I am currently in UTC.

What are my skills: My skills include HTML, CSS, other random bits of languages and such, other boring stuff but I can solve a rubiks cube in under 40 seconds! No jokes it's pretty fun, I have a general interest in computers and security in general and I am hoping to pursue that. The 2 things I am hoping for out of a group are 1stly somewhere to learn and get better at things and 2ndly a rival to challenge me and get me to reach higher places.

Will you represent us in a HQ fashion?: Of course I will wherever I go.

Skype/TS?:I use both, my skype will be shaw511.hf and I will be able to go on teamspeak anytime.

Are you willing to do a fair amount of Hw?: As long as it doesn't get in the way of my actual homework :p but if its homework that I enjoy then I can't really class it as homework anyway.

Do you have a mic?: I indeed do have a Microsoft-livechat LX-3000.

List of some noteable threads?: I had an old account on here but I haven't visited in about a year so I forgot everything about it, and so this account was only created recently.

How will i benefit the group?: At the moment I will not be of much benefit to the group on a whole but in the future I will be more than happy to return any knowledge I possess.

Are you Willing to help the group out with projects?: Well if it is in my field of work then I will always be happy to contribute, and if not, then I will learn that different field and contribute anyway :D.

Why should you take one of the remaining slots available?: I think that I should be accepted into your group because I do want these things, and it is not a lie. I want to be there and do extraordinary things and work together on certain things, instead of stubbornly trying to do it all myself.
