I know you given credits but:

- 1) Too many pumpers available
- 2) You just went here: <https://hackforums.net/showthread.php?tid=192181> RIPPED the whole source and released it with another GUI.
- 3) Whats the point in this?
- (2*) Why?

I understand the fact that you given credits but whats the point? you just copy paste the source n release with another GUI, maybe you shall start codng on your own
