Thread: [Scammed by 0x - | uid=1125619](#)

CoderEX - October 31, 2015, 8:09 am

Hello guys!

It seems to me that I have been scammed by the user "0x -"

We made a deal where he was suppose to program me a piece of software, and he never did. He never sent me ANYTHING whatsoever. Kind of irritated, to say the least.

So, after submitting my payment he instructed me that the project will take 7 days max. I decided that the time-frame was okay, due to the complexity of the project. But anyways, so the user then kind of disappears without saying a word to me for a couple of days, but then when I message him on HackForums, he then replies saying "one word, hospital." It's not that I do not want to believe him, but I just do not believe him. Also, I have been spamming him on Skype for the past few days, not a single response. Lol. He also said he was a past leader of the group NULL.

Now, I know it was pretty naive of me to handle the service deal the way I did, but I am new to this part of town, so I was kind of stupid. Lol.

I am currently working with PayPal to get back my money, but I wanted to post a thread to let others know about 0x - !

You should have checked his reputation. I wish I felt sorry for your loss, but I don't.

b?xxy - October 31, 2015, 8:11 am

Put his user ID in the title.

Alitje - October 31, 2015, 8:12 am

YOu got scammed hard boii, chargeback !

I do not blame you for feeling this way. My friend showed me his reputation not to long ago, and that is when I realized I messed up hard. Lol.

How do I retrieve the user ID?

By going to the user's profile and copying the last bit of the URL. In your case 0x-'s:

Code uid=1125619

I would, but then that would effect the legitimacy of the charge-back if anything were to happen in the future.

I would rather put a claim with PayPal, and have them deal with it.

I'm not worried about it, because he knows he is wrong.

He cannot deny the fact that he scammed someone.

I have nothing to be scared of. Lol.

Thank you very much!

I've got some pictures of him. He's a complete scammer. All he does is scam people and card.

Here is some proof, he buys gift cards and encodes dumps into them.

He also inspect elements his BTC wallet and says he has half a million dollars lmao. This scum is so fucking poor, he needs to scam to live.

Don't trust this unfaithful stupid fuck who can't code for shit :)

I am prepared to take this to the highest degree possible.

The only thing I wish I could change about this situation is not meeting him at all. Lol.

It wouldn't have to waste my time with me, if I had not met him at all.
