Thread: [Was trying to embed Countdown](#)

BTB™ - October 31, 2015, 9:03 am

Hi Staff Members,

I was trying to embed a Countdown in my thread.

It had to do with a thread that I was trying to create in the "Lounge" section.

And suddenly, a page came that stated - "You have been blocked".

I was like Shocked!

I am posting this just to inform, I never had bad intentions whatsoever. And at the same time quite surprised why this page came.

It said to note one CloudFlare Ray ID and that I have noted!

Hope everything is fine. And please do let me know why this page appeared? Regards.

The most likely scenario was Cloud Flare didn't like the Countown Image Hoster.

Try to use a different website for the countdown image

Oops!

And I was like terrified why this message came! Like I am blocked!

ID blocked and all finished. You can very well understand the situation bro.

Thanks for updating, everything is fine.
