Thread: [Exploit SatoshiMines 100% Bulletproof Method | Instant refunds if you lose your money](#)

Raymond Reddington - October 31, 2015, 9:20 am

Alright,

To the ones who are gonna roast me for saying "100% bulletproof method in gambling makes no sense", yea I do agree. This is not 100% winning method, this is 100% not losing your money.

What you need?

- A Fast RDP
- Bahnahnah's Opensource satoshibot
- Ability to follow my instructions

More information -

You need around \$15 to invest initially and then its all automatic.

You earn around \$40 a day. Now I know its less, but you can always use multiple RDPs or multiple instances in the same RDP.

Typical question 1 :- If its bulletproof, why are you not using it and making banks? Why are you selling this?

Answer - The income is pretty low, like \$40 or so in one day in one RDP. I am using it as we speak, here is a screenshot. Its like 2 bits per second. Remember, you can always use multiple instances. I can sell this to make some more money along with using it, what's wrong?

See how the bits are increasing continuously.

Is this an Exploit - In a way, you can say it is. SM allow unlimited requests without a captcha service which makes it vulnerable to programmed bots with little AI.

Can this be fixed? - No, I dont think SM are gonna fix it.

Wait, by the time I wrote these lines here is my balance -

How can I trust you?

- Well, I have been in the marketplace for long now, I think I am trustworthy. However, I am gonna gives one vouch copy to the guys you say. DO NOT BEG OR PM ME, just post below who should be given this vouch copy, F8, OMNI, Phyber Zserity, anyone you guys say.

Price - 1 BTC

Have questions? PM me or post below.

oh oh oh, BTW by the time I wrote these lines, this happened.

Read the full thread for countless proofs.

Inj3ct0r? - October 31, 2015, 9:25 am

Vouch. I am currently doing this. Works like a charm.

DaFreak - October 31, 2015, 9:27 am

Vouch, he once did show me over Teamviewer but then it was all manual. Glad to see it being implemented in this way. If I were not against gambling I'd do it, but yea it's definitely working.

When I am offering a full refund, I don;t see why I should give you a "DISCOUNTED COPY".

? Follow the posts mate, you will know.

(Oct 31, 2015 11:05 AM)D3RP Wrote: [\[CITE\]](#) In the long run mathematics guarantees that you will lose money. Its due to the return vs risk percentage.

Keep cashing out at 100K bits, trust me you won;t lose shit.

I cahsed out my previous 100k and now working on this one as we speak.

Proof no .6 ^^

Well, goodnight. Will post more proofs tomorrow when I get up.

Going to get the bitcoinage award soon.

Peaceeeeeeeeeeeee ? ?

D3RP - October 31, 2015, 11:12 am

Hey man!! I re-looked at ur gifs in the beginning of the thread. It looks like the bot just plays tile 1 repeatedly, U even have a portion of the vid when the bot played tile 1 and the bomb was in tile 1 and the balance decreased, after ward it just increased the bet ammount so that it would make up for that loss if it wins, and the bot again plays that high value with tile 1 as the guess. and it won therefore it made up for the loss. Additionally, it looks like the bot is just playing on 1 mines games. Please correct me if I am wrong. But I have already run a bot on 0 balance and it hit too many bombs in a row to continue, I believe that it hit close to like 6 mines or something. << all playing that same tile 1.

I have created some extremely complex and convoluted strategies for satmines and they profit extremely quick however the results are inconsistent, Initially I started my satmines venture obv with just 1 mine in all squares and none would profit in the long run even with a 1 BTC starting balance in the wallet.

Dorrance - October 31, 2015, 11:16 am

Alright I will purchase this after I order BTC, you know me on Skype.

funtela - October 31, 2015, 11:16 am

It plays on one mine, correct, there are other things involved. You can try yourself using one mine and one fixed tile on the bot which is available for free, but you will lose money in that for sure, I can guarantee that, if you don;t believe what I say, try it and come back to the thread and post a result. When you see my screenshots, you just see rising, there is no fall in bits at all. I am using something private and that's what makes it an item worth 1 BTC. Trust me man, you can't guess it.

The time I wrote it, this happened

Edit: It should probably be made clear that it takes about 16 days to break even on the 1 BTC + \$15 investment

that's not accurate at all. that is if you are only running it on one machine, if you have 16vps running it takes 1 day to break even on the 1btc but you would need (16*15\$) in investment for that 1 day as well.

SIM-1729678 - October 31, 2015, 11:46 am

Do you need any experience with satoshimines?

D3RP - October 31, 2015, 11:46 am

(Oct 31, 2015 11:45 AM)ch341ser Wrote: [\[CITE\]](#) I'm willing to bet it's just a martingale strategy..

it's not, I already spoke to him, it is martingale in the sense that it only plays 1 tile but there's more to it.

(Oct 31, 2015 11:46 AM)ScreemS Wrote: [\[CITE\]](#) Do you need any experience with satoshimines? No that's the whole point of the automated system it plays the game for you, all you have to do is know how to use bitcoin and deposit money into their wallet so that the bot can take over from there.

the wolf of blockchain - October 31, 2015, 11:48 am

(Oct 31, 2015 11:46 AM)D3RP Wrote: [\[CITE\]](#) it's not, I already spoke to him, it is martingale in the sense that it only plays 1 tile but there's more to it.

No that's the whole point of the automated system it plays the game for you, all you have to do is know how to use bitcoin and deposit money into their wallet so that the bot can take over from there. Does it involve increasing the amount you lost in the next bet?

Vegas - October 31, 2015, 11:52 am

I have no monies but I will trade you an original song for this method

D3RP - October 31, 2015, 11:54 am

(Oct 31, 2015 11:48 AM)ch341ser Wrote: [\[CITE\]](#) Does it involve increasing the amount you lost in the next bet?yes it does, you can see that in op's gifs. He hits a mine and immediately recovers.

NoHax - October 31, 2015, 12:05 pm

Huge vouch for Raymond, it doesn't get more legit.

Matt Bomer™ - October 31, 2015, 12:07 pm

Going to buy as soon as I get another \$100 to make 1 BTC.

Matt Bomer™ - October 31, 2015, 12:17 pm

Does that mean, if I buy 10 admin RDP's and start working on all of them, I make \$40*10. Just asking.

D3RP - October 31, 2015, 12:23 pm

I did a little math to see how long the bot can run on a 1 mine game:
50K initial balance

as you can see from the spreadsheet, there's discontinuity between 25 bits wagered and 1 profit vs 25.xx bits wagered and 1 profit, therefore the user is forced to do 26 bits wager per 1 profit. therefore:

30 wager > 1 profit

806 wager > 31 profit -- LOSS 1 recover

21762 wager > 837 profit -- LOSS 2 recover

Therefore with a 50k initial balance the bot can recover from 2 losses and still keep playing.

**Sorry I should point out that this calculation assumes that by recovering you are still profiting 1 bit.

Else it would look like this:

30 wager

780 wager > recovers 30

21060 wager > recovers 810

dead here:

play half a bitcoin to recover 21060+810 bits.

High-Res - October 31, 2015, 12:57 pm

May I ask why you can only do 1 per RDP? Does Satoshi mines limit you to 1 game per IP or something?

Raymond Reddington - October 31, 2015, 12:58 pm

(Oct 31, 2015 12:57 PM)High-Res Wrote: [\[CITE\]](#) May I ask why you can only do 1 per RDP? Does Satoshi mines limit you to 1 game per IP or something?

Nope, I personally have tonnes of legit RDP. My friend has a hosting business, so I can get as many as possible. You can do on single RDP too.

High-Res - October 31, 2015, 1:00 pm

(Oct 31, 2015 12:58 PM)?Raymond Reddington Wrote: [\[CITE\]](#) Nope, I personally have tonnes of legit RDP. My friend has a hosting business, so I can get as many as possible. You can do on single RDP too.

But why would 5 RDPS make me more money than one? The bot can't be using up all of the processing power. Is it just a matter of having 5 IP addresses?

D3RP - October 31, 2015, 1:03 pm

(Oct 31, 2015 01:00 PM)High-Res Wrote: [\[CITE\]](#) But why would 5 RDPS make me more money than one? The bot can't be using up all of the processing power. Is it just a matter of having 5 IP addresses?

it's not processing power, satmines firewalls you after too many requests/ second..
therefore you need more ip's

Fish - October 31, 2015, 1:05 pm

so every three min you make ~2k?

Raymond Reddington - October 31, 2015, 1:09 pm

(Oct 31, 2015 01:05 PM)Fi?h Wrote: [\[CITE\]](#) so every three min you make ~2k?

Roughly yes you can say that!

(Oct 31, 2015 01:00 PM)High-Res Wrote: [\[CITE\]](#) But why would 5 RDPS make me more money than one? The bot can't be using up all of the processing power. Is it just a matter of having 5 IP addresses?

5 RDP = 5 times this method altogether! Do the rest of the maths! I said earlier that you can use 1 RDP too.

4158996621556 - October 31, 2015, 1:33 pm

Ok so, I was very interested this and I "wanted" to buy it.

But seeing the cost, I had doubts.

So I looked at the images, trying to see what method he was using.

And I can safely say that:

1. OP says that this method is " Bulletproof " aka: You WILL make money 100%. When, we can see that in the title he wrote " Refund if you lose your money "

2. This method is based on common sense.

3. Every post that he makes on his thread is him refreshing the balance, teasing people, showing " proof " that the method actually WORKS.

But he never tells us WHEN was the last time he refreshed, so the balance is OLD, but we don't know HOW old it is.

Anyone could go to his satoshimines.com balance, leave it as that, then gamble for 4 hours and refresh the balance.

BOOM your 15,000 balance turns into a higher number.

He gives the illusion that this method earns quite quickly, when I can say that this method is pretty damn slow.

The method can be found just by looking at the gifs given by the OP, don't bother buying I don't know why people have bought it.

OP is selling this method cause IT GIVES YOU WHAT ITS PROMISED (\$) but it's SLOOW.... So instead of earning 1200 per month with this method, he earns 1200 per month + 1000 each sale.

D3RP - October 31, 2015, 1:35 pm

shit sorry, don't know where I picked the 1000\$ up, I know what a BTC is worth.

We know that the pictures are fluid.

But for example.

I load this thread, I go to sleep and I keep my pc on, the thread has 9 pages, the day later I record me refreshing the page, suddenly from 9 pages it turns into 14 pages.

Does that mean that there were 50 replies in 10 mins?

No.

No.who cares what the time is. If the bot didnt bust it's worth gold. I've never made a strategy that survives 2 days without busting. << Given that we are making up for loss the very next bet. I think op needs to do a join.me and show us proof of the bot actively running and making bank. I agree with you on the fact that the proof is somewhat sketchy. and there are alot of inputs and outputs to op's bitcoin address for no reason. And none of them at the 100k that he claims.

4158996621556 - October 31, 2015, 1:57 pm

As I said, the method DOES WORK, but it doesn't make you thousands of dollars a day, unlike selling the method itself.

If op was to refresh everytime, then you would see that he would only gain 10 bits per second, who knows.

But he makes it seem like with a click of a button you gain hundreds of bits.

Also, most of the other things regarding the method are correct. You're very close to understanding the system behind this.

Rubentastic - October 31, 2015, 2:16 pm

If only it was a bit cheaper lol. 1 BTC is a lot to just hope the method works. I mean too many things like this appeared to be non-working after a while.

Raymond Reddington - October 31, 2015, 2:26 pm

I can't do anything for the ones who still don;t believe. I can just keep posting proofs.

Yet another one, I made another BTC wallet, just for this purpose, here is what I got in 2 hours.

1.

<https://blockchain.info/tx/acae870e30e18a071084e4296d770aa2e42e3b7f83223498a179ce45452ea71c>

2.

<https://blockchain.info/tx/6aae72bb700d66571811f840a0206c37675c49018949462515d27521676bfdce>

I repeat again, the method is slow, but definitely a gold mine.

For the ones who still don't believe, I am sorry I can not do anything.

Royal Crowd - October 31, 2015, 2:28 pm

If you don't believe this works then you're stupid because Raymond wouldn't sell a stupid, non-working method.

However, instead of paying 1 BTC for this you can just deposit \$3 into SM and turn it into \$90 the easy way like me :D

Have a nice day! ?

Raymond Reddington - October 31, 2015, 2:29 pm

PS - Now I read what BS was going on here. Alright, those of who thinking its just one click one mine game, no its not. If you don't trust me, use Bahnahnah's bot yourself and keep trying it until you lose your money. There are some tweaks used with the bot since its opensource and then it is used, I haven't lost a single cent yet. Made like half coin already, and soon I will be getting the bitcoinage award, so that would be enough proof.

Also, if you think this is not worth 1 btc, then don;t buy it. idgaf.

Game number - IDK what, but its still working like it was scripted to work.

Saga continues,

Cashed out all after 1 day game. This is what I made with once instance.

Enough posting proofs now. I m tired linking them, you have the btc address, lookup the transaction hashes yourself.

Update - started new games for today again. Last day earnings posted above, will post today's by the end of the day.

I don't understand the logic here. He says it involves the same thing (same bot, need an RDP, and \$15 to invest). But the kicker is the rate that you gain bits. Why should I pay an extra .15 BTC for the same results?

Like I said the methods don't have to be 100% similar, although it does look like the basis of the methods use the same concept.

(Oct 31, 2015 10:54 PM)Inj3ct0r? Wrote: [\[CITE\]](#) Why are you trying so hard Grievous, he isn't even replying to you. Why not market your product on your own thread?

I'm just concerned that OP can't even answer why this is better than Grievous' method without acting all butthurt. He is just denying the similarity which is kinda sad because that is just ignorance that he has competition.

Anyway no use bickering, GLWS

OP doesn't know what his method is and OP doesn't like to make guesses like him.

I don't even need to answer this, you realise?

OP = me.
His = brokeboi

Read the fucking post to which I mentioned it.

And this is where OP accepts defeat because he can't argue and resorts back to name-calling.
Sigh..

Because Reddington is used to selling things at ridiculous prices, and having no competition. He should also learn how to speak proper English.

And you are what the judge? You are just one jealous guy. Noone even asked your opinion. Keep bitching it will get you nowhere. Now you will make some smart comment right? IDGAF. I have a life which involves more than just defaming other people.

See dude, don't sale trash. Let the person sell according to his rate, if you don't want to buy, no one is forcing you.

The method works, i have seen it live.

And "learn how to speak proper English"? Seriously? Who gives you the right to comment on that.

He1senb3rg - November 1, 2015, 7:24 am

Can I just ask one question?

Is this just playing with 30 bits on 1 mine, and multiplying by 26 on a loss.
The stats for that would be:

The stats for that would be:

No.

You are probably talking about some grvious method.

He1senb3rg - November 1, 2015, 7:45 am

So its not martingale in any form? correct?
By martingale, I mean bet increases in some form if you lose.

LordCoder - November 1, 2015, 8:54 am

Multiply on loss method? If so, it's a waste of time.

funtela - November 1, 2015, 9:07 am

This. Please answer this as I'm ready to purchase.

Also, you mentioned ~\$40 daily can be earned. So if I had 10+ RDPs and/or instances running, this will make me \$400+ daily?

Raymond Reddington - November 1, 2015, 9:35 am

No, its not. Just made a sale. Customer will post vouch soon. ?

Solomon Grundy - November 1, 2015, 9:36 am

the purchase went well, this is aweeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeesome never seen method and for the record its NOT MARTINGALE SYSTEM, but a very clever system and all of u who made the thread are wrong about it. That every guess on the thread is wrong and its something unique

this is sweet watching my coin grow like weed. vouch ?

Farmer John - November 1, 2015, 9:39 am

I'll only consider buying this if OP is selling a limited number of copies... because if this do works he'll easily sell 100 copy, if everyone is running 10 instances this mean \$1M + in losses for SM per month.... with only 30k visitors monthly I don't think they will stay open for a long if they can't fix this...

Raymond Reddington - November 1, 2015, 9:42 am

My first real customer.

Thanks man, enjoy. You can tell the idiots, this wasn't a martingale system.

You guys think I m lying?

What if I say, I stopped selling already? ? ?

Thank you guys for making this thread hot. I am gonna use it for myself for the time being and

make profits, I needed like \$500 and so I was selling it, now that I have sold one copy and don;t need more atm, so I m gonna close this temporarily. When I feel like its the time to sell again, I will reopen this.

Thank you.

Raymond Reddington - *November 1, 2015, 9:46 am*

Answering all PMs. So, you can contact me.
