Thread: [MAC, LINUX AND WINDOWS Crypting Service!!!](#)

ng-Coder - November 1, 2015, 1:40 pm

About:

Our Net-Protector can help you protect your executable binary like ELF(Linux), MachO(Mac) and EXE(Windows) from reverse engineers, software analysts, software crackers and antivirus engines (checked with 35 different antivirus engines), both scantime and runtime.

Our goal is to encrypts and protects your programs code from reverse engineers and to make analysis harder.

Protector Features:

Protector is coded in C/ASM.

Protector can protect binary format of type ELF(Linux), MachO(OSX) and PE(Windows).

ELF(Linux - .out) - Protector is been tested with Netwire and few Linux bot and works fine on all linux versions that each claimed to be compatible with.

MachO(Mac - OSX) - Protector tested with Netwire and works fine on all OSX versions that Netwire claimed to be compatible with.

PE(Windows - .exe) - Protector tested with many executable and works fine on Windows XP/Vista/7/8/8.1/10 x64/x86

Each crypt will have unique stub, We have just around 10 stubs for each platform.

What's the stub size?

Stub size is highly vary and there is no average stub size, but min is 20kb and max can up to X2 of your code.

Pricing:

ELF(Linux - .out) \$200/Crypt.

If the crypted ELF file gets flagged by AV in less than 30days after the first crypt, we will recrypt the same crypted SHA1 for free.

MachO(Mac - OSX) \$200/Crypt.

If the crypted MachO file gets flagged by AV in less than 30days after the first crypt, we will recrypt the same crypted SHA1 for free

Note: ELF and MachO crypting customer can have our cross-platform macro downloader which

works on all Mac having (Office 2011) and on all windows Office at cheaper rate \$50 instead of initial \$100, the downloader verifies the OS and download appropriate executable.

PE(Windows - .exe) \$100/Crypt.

If the crypted PE file gets flagged by AV in less than 30days after the first crypt, we will recrypt the same crypted SHA1 for free.

Payment methods:

Bitcoin and Perfect Money only.

Escrow Service is welcome, buyer must agree to pay full escrow fee.

pm me for private Mac Crypter, Linux Crypter or Windows Crypter.

Note: We don't deal with dependency codes and we won't crypt binary written in such language like Java and VB.NET. Binaries written in native language such as VB, C/C++, OBJC, Delphi, ASM e.t.c are all welcome.

AAA+ - July 4, 2016, 4:50 am

Im guessing no vouch crypts? Imfao

Lol, no vouch crypt ?, I sold almost all the stubs, only Mac stub/slot I'm having left at the moment.

HiddenEyE - July 5, 2016, 2:53 am

vouch for my great coder ~ ng-Coder he always good to go.

kauf - March 1, 2017, 10:30 pm

can i get your cross-platform macro downloader which works on All Mac and Windows?

zinox - October 23, 2018, 5:40 pm

Ng coder please can this work with formbook?

Lextian - October 23, 2018, 9:28 pm

This is def worth the money, am glad to see you brought this service back, i have personally tested his crypting service in the past with his formbook bot and it was awesome, upon detection within 30days he refuds my bin and thus i was able to work with this and having long fud, don't hesitate to buy this guys., please hit me up when you have windows stub am surely interested.

Ofc it does mate.

williamsleo - June 5, 2020, 10:56 am

are u still on sell. please i want o buy

xloader - October 15, 2020, 6:07 am

I can confirm that this Mac and Windows stub works perfectly with xloader!!!

Barsoumian007 - December 7, 2020, 7:59 am

is your discord still working?

EPS Tech - *July 13, 2021, 4:10 am*

How long will it take to receive protected file after paying?
