HQ! Such an invaluable tool in my line of work. Since I bought this I've bruted enough logins to scan fresh lists (at no loss to myself) and have a few extra to spread around my community. A+ work on this. I literally will use this every single day.

Does it come with Lists?

Is it only for windows?

Is there anyway I could make RDPs out of these?

It comes with lists, it cracks all types of ssh logins, you could make an rdp out of it!

SIM-1980240 - November 3, 2015, 12:26 pm

Another great product by Bandors, the product is amazingly fast. It makes hacking SSH logins as easy as pressing a "Hack me" button!

n0syst3m - November 3, 2015, 1:30 pm
