Thread: [\[TUT\] How to hack a website database.](#)

kmz22222 - November 3, 2015, 2:00 am

I just want to thank Motiv for -rep me and removing all +rep i had.

But, that doesn't mean i will stop sharing the info.

And i won't do any Q&A again unless i get my rep back.

(Nov 2, 2015 03:18 PM)Motiv Wrote: [\[CITE\]](#) "how do I hack a website db"

OP: I'd get my groupies to dos it And that was the reason for what i got -rep for "ddos is not an answer"

Gotta answer your question,FOLK!

Any thread like this should be copy of my thread posted at:11-03-2015, 01:34 AM

What you need:

- Brain.exe

First of all there is 2 kinds of database hacking. 1-Social media hacking 2-Normal website database hacking.

How to hack social media accounts:

1-Instead of hacking the database we would hack the victims account. i am using facebook for example! first add the victim to your friend list

2-Talk to him for like 1 week or 2 days

3-Make a YAHOO EMAIL If you have a one already just login into it

4-Go to add social media account and sign in with facebook

5-Go to inbox of the social media you would see his email.

6-Hack the email and reset password for facebook.

Hope this was explained well! PM Me with a picture of what step you can't do i would help you

NOW ITS TIME TO HACK NORMAL WEBSITES

We gonna use MYSQL or SQL Exploit. this happens to most of sites [even happened with hackforums]

To make a website have that exploit it can happen alot for sites with .net Due to the poor dev. OR: If you made bots that keep making account in the site probably it would get a SQL Error. If its already have a sql error, DDos also could result in a sql error.

If the site already have a sql error you can hack it by Havij!

http://d.ibtimes.co.uk/en/full/267595/how-hack-website.jpg

Its free program,You can find some tuts on google and youtube.

IF THE SITE DOESN'T HAVE A MYSQL ERROR

Then its time to ddos,THIS MIGHT HELP YOU

<https://hackforums.net/showthread.php?tid=5041486>

For an easy example we would use LOIC <http://sourceforge.net/projects/loic/>

http://www.lefigaro.fr/medias/2010/12/09/e0c60c36-03a4-11e0-ac81-a95336abb16e.jpg

Just type the ip and the port and click imma chargin my laser.

For more powerful DDOS you might need help from friends

OR Buy a good booter.

Hope this was useful.

Please note that: I don't have enough time to explain further and explaining all technique

? Soufian ? - November 3, 2015, 2:05 am

I've never read so many bullshit in a thread this year.

"6-Hack the email and reset password for facebook."

You serious? It's obvious you can hijack an account if you got access to someone's email.

You can't randomly "hack" someone's e-mail.

Also, Loic is NO ANSWER.

Loic can't take down anything beside a simple home connection, mostly not even that.

It also just simply reveals your backend/home IP, it's basically a fucked up "DoS" and not a "DDoS".

And Havij is no hacking tool, it's just a tool which helps out to quickly SQL Inject a website which is vulnerable, and not all website's.

There's my story for today.

How bout using your brain - November 3, 2015, 2:11 am

Hahahahah this thread is awesome.

I think your brain.exe has segfaulted too often to come up with so much bullshit in one thread lol.

You literally gave me cancer in this post, thank you.

There's my story for today.

Loic was an example. I mentioned DDos booters,they are also available.

Hacking emails is possible,But i don't have time to make tuts for that.

Look what he wrote m8:

(Nov 3, 2015 07:04 AM)Red King Wrote: [\[CITE\]](#) We would Love to Hire such an expert hacker. But he is over qualified So Google Security team Decided to refer him directly to Barack Obama. He will be appointed as the Leader of Cyber Security & Information Assurance (CSIA) U.S.A Soon
U mad bro?

Bollywood - November 3, 2015, 6:25 am

Thanks for tutorial, Just hacked my friend's Facebook. Now I will try to hack facebook with this Havij tool ?

kmz22222 - November 3, 2015, 7:06 am

(Nov 3, 2015 07:25 AM)rahulnegi94 Wrote: [\[CITE\]](#) Thanks for tutorial, Just hacked my friend's Facebook. Now I will try to hack facebook with this Havij tool ?

Gratz on that!

But Havij won't work with facebook.

Facebook is something big for you to take control of it.

Its not possible for facebook to have a sql error, come on dude markzuckerberg should have enough money to make facebook hard to hack bro....

If you want to ddos facebook,I suggest you not to. they have high traffic

its 99.99999% impossible for you ONLY to take down facebook

you need to pay shit tons of money to take it down yourself.

But could a hacker with your level of expertise take facebook down? You must have some secret private method to hackz them?

kmz22222 - November 3, 2015, 7:13 am

(Nov 3, 2015 08:11 AM)How bout using your brain Wrote: [\[CITE\]](#) But could a hacker with your level of expertise take facebook down? You must have some secret private method to hackz them? Only me?

I would need money to do that.

But you know, There is some people in the world here called anonymous ;) they do help well.

Anonymous is Some friendly hackers in the world that fight against bad things.

What i mean by that, Taking down facebook with a group of people is possible.

Mihai213 - November 3, 2015, 7:14 am

Good job bro.Thanks a lot!
