Thread: [Ecatel Shit Output and shit Power](#)

omarkamaly - November 3, 2015, 11:01 am

So i bought an ecatel dedi and i scanned for a good fresh NTP list then i attacked the input was shit it didnt even lag a home connection wtf is going on??

_NoSaimo - November 3, 2015, 12:09 pm

omar send me my dedicated server! u scam me?!??!

Same here, anyway it's not the right place for that.

On Topic:

As far as I heard some Ecatel server don't spoof at all anymore...

Ecatel is pretty much dead now.

Ecatel is pretty much dead now.really? i have omar address house and city lol..

Knowledgeable - November 3, 2015, 11:59 pm

really, wtf would u buy from ecatel for spoofing

just go to ampnode, im not even trying to advertising ampnode this time but honestly, if ur gonna spend that kind of money and not even get a server that can spoof u might as well burn it

_NoSaimo - November 4, 2015, 7:53 am

amonode don't working... i click buy and 404

Stickle3 - November 4, 2015, 8:43 am

Dont trust omarkamaly. He scammed me for 10€, poor kid.

?•?•? - November 4, 2015, 1:37 pm

idk wtf u nerds are on about

some ecatels sp000000f.
