Thread: [How to change extension exe to other ext ?](#)

photuong1994 - November 4, 2015, 5:44 am

Usually, you create a stub, it have a extension .exe, everyone always confused .exe
According your knowing, Perfect keylog have function remote install, which use bind with any extension, and output that extension.
Example: bind pdf, it output .pdf, such as .doc, .xls, or .jpg, .png.

So anyone can show me how to change extension without Extension Spoofer ? Tks.?

kickrocks - November 4, 2015, 6:39 am

why without a spoofer ? it is made in this goal , use it , it is more simple

SIM-1230922 - November 5, 2015, 2:47 pm

You can't change it.

An exe is an exe, you may only spoof it, but it will still remain an exe hence why a spoofer program is your only choice.

Support™ - November 6, 2015, 9:40 am

You can change it to other executable formats; Screensaver(.scr), Picture File(.pif), COM file(.com), Batch File(.bat) but as the user said above, spoofing doesn't change extension even if you rename it to .jpg, .pdf etc.,

Spoofer isnt an exploit dude

photuong1994 - November 6, 2015, 5:17 pm

Tks all reply, after some days I research, way to change it called Exploit. But most of Exploit tool must be paid and Price is expensive. \$>100. That price buy a perfect keylogger 2015 , it 's more worth. ?

ÇdnîS Lu?i? - November 6, 2015, 5:20 pm

There are different ways to achieve this but the easiest is to spoof the extensions like the others are saying. If you search the forums youll find one or you can get a clean DL of DC 5.3 and it comes with a spoofer but i wouldnt advise using DC.

YayHar - November 6, 2015, 5:21 pm

Extension spoofers are complete shit imo. I wouldn't go down that road.

HiddenEyE - November 25, 2015, 11:57 pm

when one spoof an exe it really dont make a difference cause it will still show exe at times when uploaded.extensions like jpg becomes so difficult to zip.

LosPollosHermanos - November 28, 2015, 6:10 am

spoof spoof spoof! I think i've seen some free spoofers around here
