NewPath - November 6, 2015, 4:43 am

I have \$400 paypal and I'm looking to get \$100 - \$200 in BTC what's the best way to do this?

You could trade with people here on HF, or you could take the easy but expensive method of VirWox

Dude, tbh with you. Offering those sort of rates are more likely to turn people away from dealing with you, as the old saying goes:

"If it's too good to be true, then it probably is"

Build up some rep and make a name for yourself here and some people might be able to help you out.

'Webuycrypto' not sure on the web address but you can get up to \$15 a day with only email verification.

use payeer.com, it is one of the few exchangers that directly does Paypal -> BTC in couple of hours, the rates are slightly above market rates but it is totally worth.

ALSO: from the way you talk, sounds like you are RUNNNIN with someone else's paypal . :D

If you want to exchange your paypal to btc on here i'd suggest getting an upgrade first. Then more people will want to deal with you :)
