Thread: [Animated glitch effect? \[PS\]](#)

Antediluvian - November 7, 2015, 8:09 am

I've been learning photoshop and have been practicing but i can't seem to find out how to do this

trying to do it with minimal effort lol

i got a still image setup as you can see in my sig
but i can't make a gif of it glitching and all

anyone know a nice tutorial? I tried youtube they're all shit :(

Graphiix - November 7, 2015, 8:11 am

I used to remember how to do this. Let me open up my photoshop and expiremnt a minute and see if I can remember how to do it.

That'd be great thank you!

Blue Code - November 7, 2015, 3:27 pm

There many ways to do it, you can create layers to distort the image...blurring, random color effects, taking pieces of the image and spreading them in different frames, etc.

Are you using the motion graphics workspace on PS? Remember to "Save for Web".

Quick question,
How did you make your profile picture? Its really cool :D

Sacred Symmetry - November 7, 2015, 4:39 pm

Make 1static image,with animated frames that distort left and right, looks glitchy.

Saint - November 7, 2015, 4:45 pm

I was looking for this to, i will see if i can teach this myself and i'll let you know how i did it.

This should work, haven't tried yet though, goodluck OP,

YOOOOOO THATS WHAT IM LOOKING FOR. THANKS

ILL UPDATE WHEN I FINISH <3

update: this shit is confusing af.

whyso - November 10, 2015, 4:08 am

I can help you with this, Hit me up, i can show you some gif that i have done. that does not include in my portfolio.
