If there's any information that is compromising to someone (highly), PM me and I'll remove it.
Things such as:

- Nudes
- Passwords
- SWAT requests
- SSNs
- CCVs

Zefie420 - November 8, 2015, 3:29 pm

no child porn or ssn or financial information what a downgraded doxbin sigh gl op

Gallium123 - November 8, 2015, 3:34 pm

Doxing is incredibly childish and the fact that you made a site dedicated to posting that stuff shows your age

sinmar - November 8, 2015, 3:39 pm

It's definitely not childish i don't mind posting dox's and ruining people's life's if you call ruining peoples life's childish you are the true meaning of childish. but this doxbin is dumb af no ssn's just take down the doxbin or get offshore hosting so you can post anything.

MentalWarfare - November 8, 2015, 3:46 pm

most idiots think that but someone's life can effectively be ruined with a dox, see:

Don't let the haters get to you, do your thang youngster.

Calcyon - November 8, 2015, 3:55 pm

I'm not allowing SSNs or child porn because (what doxes have those?) and that's fucked up..

If you want to do something to someone, do it yourself. That information isn't something I believe should be posted.

This is a cool site, but it's very very simplistic, it'd be cool if it was redesigned a little.

Do you really think that makes you cool? Because if so, I feel terribly sorry for you. Do you not realize that ANYONE can pull credit reports and reset bank account passwords? Or are you too deluded to recognize that what you're doing doesn't make you a hacker, it only shows how much of a degenerate script kiddie you are.
