So im looking for ways to make just a few \$ and i saw someone talking about GPT sites, checked some "Top 50 GPT sites that actually pay" and a site called SuperPay.Me came up, do these actually work if you fill them in? Would love for a response off someone that has or uses these currently

Why 2\$ a day? Seriously, don't you think its better to do some research on better monetizing techniques and earn alot more than 2\$ per day?

It doesnt matter why its \$2 a day :) it was an estimate and the point was i need a tiny method to make a tiny amount of money, i dont need or want to make "alot more"

Better just find work, surveys cost you alot of time to complete and they pay out like this
