What is it?

Cyber dropper is the most advanced dropper on the market, that's not only scantime FUD, BUT ALSO runtime FUD!

Cyber dropper will increase execution rates by phenomenal numbers due to it's extremely small and stable stub.

With countless hours put into creating this masterpiece, we assure you this is nothing but the very best.

[?] Cyber Dropper is 100% Scantime FUD. See the bottom of the thread for a up-to-date scan.

[?] Cyber Dropper is 2/17 Runtime FUD!

[?] Native. Cyber Dropper is coded in C++, ensuring that you get the most possible executions.

[?] Minuscule stub size. With a output size of just over 3Kb, this dropper is perfect for spreading and binding!

[?] Custom Execution Delay.

[?] Amazing Support! With dedicated staff, you can be guaranteed that all issues will be resolved.

Scans: [\(Click to View\)](#)

Currently working on fixing some of those detections.

Scantime FUD!

Pricing Information:

1 Build - \$10

Unlimited Builds - \$25

DamienVC - November 9, 2015, 12:41 am

BullGuard is a fake detection, it supposedly detects notepad/CMD runtime too

N3oNight - November 9, 2015, 1:39 am

I dont see you using RunPE over here so it can not be runtime FUD as its dropping the file on HDD.

DamienVC - November 9, 2015, 1:49 am

Also which was the file that was dropped?

Could you try dropping DC stub then taking a runtime scan?

?Cyber - November 9, 2015, 3:34 am

Working on it now.

?Cyber - November 9, 2015, 4:24 pm

Getting a LL scan now.. wait for the results =)

Runtime scan on Luminosity Link, not as good as I had hoped but will be fixed soon, still better than any other dropper on HF.

It's a program that downloads & executes your stub, therefore instead of spreading your stub which is probably 100kb+, you can spread this file which is a measly 3kb

Incendiary. - November 10, 2015, 2:15 am

Still FUD and still running!
Contact us ASAP if you are interested in buying.

?Cyber - November 10, 2015, 2:04 pm

Online for support & purchasing questions.

Thanks ?

Trying to be a bit different than the constant .net programs that flood the market.

Does it mean I can bind this 3kb dropper to another program, and easy infection? Because tbh I don't see much differences between using a 3kb and 100kb+ stub.

That is one use for it, yes.

You can bind it to any file with an tiny increase in size. It is also very useful for exploits.

The uses for it are seriously countless.

Incendiary. - November 13, 2015, 10:51 pm

Sales still going strong!

Dropper is still scantime FUD and Runtime UD.

?Cyber - November 15, 2015, 3:57 pm

We're both available for any pre purchase questions!

Incendiary. - November 16, 2015, 4:36 pm

Still FUD and ready to go!

Let me know if you have any pre or after sales questions.

?Cyber - November 17, 2015, 3:56 am

Still FUD, glad to answer any questions!

Incendiary. - November 18, 2015, 9:52 pm

Sales going strong!

We are also still FUD!

?Cyber - November 19, 2015, 6:09 pm

We're both available for any pre purchase questions!

Incendiary. - November 20, 2015, 5:57 pm

We are still FUD scantime and UD runtime!

Feel free to contact me if you have any questions.

Clout Lord? - November 20, 2015, 6:12 pm

Hmm is it really still FUD? Does that mean we don't need a crypter?

?Cyber - November 20, 2015, 6:13 pm

No, you do not need a crypter.

CapsBruh - November 20, 2015, 6:17 pm

Can you please PM me the full functions list, I really don't see them.

Incendiary. - November 21, 2015, 7:25 pm
