Thread: [EVERYONE|6 GB RAM|4 CPU|30 ssd/hdd|Vps](#)

i a m g o n e - November 9, 2015, 3:26 pm

HOST IS EXPERIENCING DDOS ATTACK, WILL SEND OUT VPS WHEN I CAN BUT I CAN'T GET INTO THE PANEL

Not sure how long they will last, im using a method for this

These are obtained legitly however

Specs list:

6 gigs of ram

4 vcpus

30 gigs of ssd/hdd space

Can install centos or ubuntu, not wanting to do the windows rdps due to issues with installs not working

install times may vary for these.

Centos 7 will not be installed due to issues.

Post below, i have limited pm space.

If i don't get to you, sorry.

edit: ubuntu version is 13.10, 12.10 or 14.04 lts

edit 2: don't do any illegal shit please :)

Um sure, I'll take this.

I'll use this as another exit node.

Please use CentOS.

I really need one man. Thanks a fuckton dude. <3

Unconvicted Felon - November 9, 2015, 4:16 pm

I wouldn't mind taking this to use for educational purposes.

[\$(5)\$] - November 9, 2015, 4:23 pm

I'd love this! Is there any possible way to try and get Windows on there or is that completely out of the question?

Regardless, thanks in advance.
