Thread: [Whats the best vpn/proxy solution for me?](#)

timsticles - November 10, 2015, 1:54 am

Ok so I have a few vps's but they arent in the country's i need them to be in so i need a proxy or a 3rd party vpn service to use that is both encrypted and DOES NOT leak info like HMA and all those poop ones.. Speed isnt a major factor aslong as its over 10Mbps

I need like 5-10 proxy's / vpns at the same time and I would prefer I could change the IP every few days

Nothing too expensive lets say 50 dollars a month total for 5-10 simultaneous connections

What country are you looking for?

?Stark - November 10, 2015, 7:07 am

Try Ra4wVPN

they have 28-29 Location

You need a bulletproof VPN if you want IP addresses that switch regularly.
