Thread: [Stealing a steam inventory](#)

Rjmelnick97 - November 10, 2015, 5:37 am

So in the past I've been scammed by many of people on steam and I'm looking for a way to steal items from this one guy in particular inventory. I don't know how to go about. I have a key logger. But unsure how to distribute it. And so forth. If anyone knows what I can do it would be great.

Itz.Bio - November 10, 2015, 6:20 am

I mean you could check out my old ebook found on my threads called steam swag. Your choice however. Tells you how to steal steam inventories and what software to use

Fabio Borini - November 10, 2015, 6:23 am

Best way to do this is to buy a steam stealer that is premade if you have no other knowledge about it.

palwan - November 10, 2015, 6:25 am

with the new steam mobile authenticator update its very hard to hack high value steam inventories!

Not entirely. Its impossible with steam stealers and key loggers so you would have to go with a RAT to control them when they are afk etc.

Rjmelnick97 - November 10, 2015, 6:58 am

And how would I go about of having the RAT being installed onto this guy's pc? How would I spread it?

Well either use basic knowledge and try and trick him into running it just make sure hes not apart of this forum. Ummm if not PM me and i can help you out a bit more. Your choice

rotstein - November 10, 2015, 7:50 am

if they got the mobile authentication its almost impossible... even if they are afk , you need also access to their cell phone , android rat etc.

Rjmelnick97 - November 12, 2015, 6:55 pm

But wouldn't I aka have to encrypt the hack?
