Yo guys!

The first thing is: Who are we? We are NulledByte and this is our in-progress website:
<https://nulledbyte.net/>

So we decided to code you your freedom! Yes your online freedom!

The chat website is: <https://nulledbyte.net/chat/>

Recommended to use Chrome! FireFox has some problems in drawing elements!

So if you wanna chat securly and anonymous: choose a nickname, make a room, chill!

Features:

- [+] Basic encryption
- [+] Roomcreator is roomadmin
- [+] Sick Logout Animation :D
- [+] Who is in my room?

Todos:

- [-] Smilies!
- [-] Advcanced Encryption and security
- [-] 1time pad encryption or maximum security!

Roomadmin can:

- Kick people /kick [name]
- Delete room (all chat will be deleted! No logs!) /delroom

Having troubles? Got a question? Visit channel "Help" for support!

If anyone wants to join feel free, im there right now :)

Rootings - November 10, 2015, 4:49 pm

So what's the purpose is it like you just talk about code or we can talk about anything

Onlykl - November 11, 2015, 4:52 am

(Nov 10, 2015 05:49 PM)Rootings Wrote: [\[CITE\]](#) So what's the purpose is it like you just talk about code or we can talk about anything

You can talk about anything you would like, join room 'hf' or if you want private chat with your friend you can create own room :)

New Updates:

- ~ Userlist in group now works
- ~ Security have been updated!

ZorgaBorg - November 11, 2015, 5:11 am

Looks like an awesome service!

Wrong section guys, belongs in the website showcasing section.

HazrdN - November 11, 2015, 6:43 am

Rather use xmpp or irc than this random shit.

freestlr - November 11, 2015, 6:46 am

Are you storing chat/ip/user logs?

Nope we are not storing anything.. there is no db or anything for chat at all

Queen Cin - November 11, 2015, 9:00 am

Looks promising. Wrong section though.

What channel do i join :S

looks nice though ;D

Mr. Assange - November 12, 2015, 1:56 am

Nope, not even going to bother with this one.

I can just use XMPP or IRC and it's as secure as this.

Wrong section also.

We can easily guess that the SSL certificate was provided my BlazingFast. The question is, is the traffic between BlazingFast's servers and your actual server encrypted using SSL?

Yes it is encrypted :)

WojeT - November 13, 2015, 5:47 am

Is there any other encryption than TLS? Looked at chat.js and there is no other encryption applied to the chat?

You should add the room name somewhere so you know which room you are in. There is also something strange happening if you start a message with a forward slash.

I know messages with / are commands like /kick
Also about the roomname: I'm working it! I make a tab based chatroom to be in multiple rooms at the same time!
