Thread: [Can anyone give me their perl DoS Script? \(UDP\)](#)

ZebraRape - November 10, 2015, 2:37 pm

I need one of these like bad. All my old ones arent working anymore for some reason. can anyone give me theirs? :/

Description - November 10, 2015, 5:18 pm

<https://www.mediafire.com/?b82sxwdsgro3btw> there bro.

Sc3ptical - November 10, 2015, 5:43 pm

Why not just use DNS instead of the raw udp power to hit a home connection

What's the point of ddosing a home connection? The person can just change IP and it's all fixed. I think your scripts works perfectly. They must have switched IP addresses. Your targets got new ip addresses. ?
