Thread: [JPMorgan Hack Three Men Charged in Biggest Bank Hack in History](#)

? Eugtique ? - November 10, 2015, 8:29 pm

The US government has charged hackers over the largest ever hacking case in financial history. The US Court of the Southern District of New York has charged three men accused of hacking into many financial institutions, including JPMorgan Chase that, according to the officials, was “the largest theft of user data from a U.S. financial institution in history.” JPMorgan Chase is one of the world’s biggest banks that controls total assets worth more than \$2.59 Trillion.
