illuminati? - November 12, 2015, 4:43 am

Welcome to our recruitment.

Userbar:

Leaders:

[Icy](#)

[Nobility](#)

[Red Sox](#)

[illuminati?](#)

What is Axiom?:

We are trying a new method of recruitment.

Axiom is a re-brand of Instinct, which was a group dedicated towards the gaming community of Hack Forums. We enjoy getting together on Skype and Teamspeak; we also enjoy to play games with one another and to relax in the Sub-Forum together. Members have stated that Instinct, was one of the funnest groups to be a part of on Hack forums; with Axiom we wish to uphold that reputation.

Requirements:

You must be an active member of Hack Forums.

Have an passion and interest for Gaming of any kind.

You must have activity in at least in one gaming related sub-forum.

You must be active within the Axiom sub-forum if you're accepted to the group.

If you have a Warning level, it will be taken into consideration by a leader with your application.

There is no set application format, be creative and make your own. Make sure to put time & effort into your application.

Any "Half-assed" applications will be ignored.

Do not PM any of us regarding your application.

Your application will be looked over by: [Icy](#), [Red Sox](#), & [illuminati?](#)

Notes;

Originally had posted this yesterday, but we decided to take the thread down as we were planning to kick all members and restart the group (we've been planning to do this for a decent amount of time), due to the fact we felt the group wasn't going in the right direction. So here is the new recruitment thread, I hope to see a bunch of new applicants and some of the old members. Good luck to everyone that applies. Take your time when you make your application, and make sure to put effort into your application.

This will be a "Rolling Recruitment," meaning this will stay open and we will add members when we feel like we could use some fresh blood, or if we kick some members.

Stixio - November 12, 2015, 4:51 am

Hey!

So I felt like I should go for this recruitment challenge as this seems like a good group, heard alot of good things about it, and there is a crazy userbar, and funny members! ?. So letz goooooooo!

Why are you applying?

I am applying because

- 1) Heard tons of good stuffs about it, and looks like an good gang with peepz!
- 2) There are lots of good guys in, that i know. Funny and usefull members.
- 3) The Userbar is crazy, ehh ?

List 2 contributions to HF you have made.[Most of my time here on HF is because of my Skin shop, only been working on that to be honest. But here ya go!](#)

What should Axiom expect from you?

Because I'm a kind, cute fella, that loves to help out! ?

Why should we pick you over the other applicants?

There Is no specific reason to pick me upon other members, But I belive this is a good group, with good members that helps eachother out, in whatever case, and therefor i mean I'd fit good to the group as I'm helpful ?

Why Should You Be Accepted:

Why do I think you guys should accept me as a member? Well, I personally believe that you should accept me because not only am I huge gaming enthusiast, but I have been a member of the group before the purge and have also been a member of Brotherhood Gaming. Another reason why I think you should accept me is because I'm a very easy going person and very friendly and super easy to get along with. The whole year and a few months that I've been here, I've never really had problems with any members of this forum. I love being here and I love the community because to me, everyone is super friendly(at least for me). I also believe I should be accepted and deserve to be in the group because I was one of the few people that actually wanted to do something with the PC

sector. I was told not to touch it so I never asked anyone if it would be okay. I thought it would at some point turn into an active sector of the group and actually be fun to be a part of, but it just sat there and Phreakdaline was the only person that did anything related to gaming for the group, or at least tried to.

Thank you for reading my application and I wish everyone the best of luck

Lacuna - November 12, 2015, 9:47 am

First of all I'd like to thank you for reading my application just to warn you I'm not very good at doing applications and writing in general but I'm going to try and do my best.

General information.

Username: Lacuna and not planning to change it anytime soon.

Age: I am currently 17 years old.

Country: Scotland

Time zone: Greenwich Mean Time Zone (UTC+00:00)

My time I have spent in axiom.

When I first joined axiom in it starting days I didn't know many people there but I was welcomed by everyone. I posted regularly in the lounge but I didn't much in the gaming sub forums because to be honest it was quite dead and when you made a thread you'd only get a couple of people replying but I should of posted more to try and get it active but I didn't unfortunately. I tried posting when Black Ops 3 just came out but I didn't get many replys. My most posted section is axiom with around a third of my overall posts there. I had enjoyed talking to the group but there wasn't many gaming opportunities. That's why I'm glad to hear the gaming is now going to be the main focus of the group which is great I have many good ideas to try and make gaming active in axiom some I have already pm'd a leader earlier about.

My current gaming platforms

I currently have:

- Xbox one (use most often)
- Playstation 3 (every so often)
- Xbox 360 (every so often)
- PC (use more for general PC stuff than gaming)
- iPhone 6

My current games

Xbox one:

- Titanfall
- GTA V
- Black ops 3 (play the most)
- Fifa 15
- Advance warfare
- And more

Xbox 360:

- A couple halo games
- COD Ghosts
- Kinect Games
- And a few other

PS3:

- GTA V
- Black ops 2
- Destiny
- And some more

PC:

- Arma 2
- Chivalry
- CS:GO
- Garry's mod
- Just Cause 1
- TF2

iPhone:

- 8 Ball Pool
- NSS
- A couple other arcade like games

Games I want and if I have the money will get

- Rainbow six siege
- FIFA 16
- Ark
- Day-z
- Fallout 4
- Dying light
- Homefront 2 the revolution

(All of these will be for Xbox one money is a bit of a problem I have a job but doesn't pay that well and will also be saving for university)

Why should you accept me?

You should accept me because I am an active member on hackforums, an active Xbox one gamer and would love to play in competitions. I would also set up torments and help in them. I would even help in torments on games I don't regularly play. I have many ideas on making the group active and have suggested some already.

How much time do I spend playing games?

I spend a lot of time playing games for example:

Black ops 3: 10 hours

TWD : 16 hours

Advanced warfare : 264 hours

Fifa 15 : 79 hours

Minecraft: 180 hours

Final note

This application took me a long time (2 hours~) and due to my lack of writing skills it may not be that good but I tried my hardest to have my point go across and hope it's good enough. I want to thank you for reading my application and have a nice day. ?

Hello and thank you for reading this!

Age: I am 18 years old.

Timezone: EST

Country: USA, Pennsylvania

A little about me:

I have never been in a group and do not apply for very many but this one really grabbed my interest. I run the largest twitch retweet service twitter account and a newly started forum based off of streaming, helping streamers and general gaming. I would love to help out others in the group by giving shoutout's etc. While I am not very into gaming at the moment I am into streaming and everything to do with it. I find joy in helping people setup streams etc.

I currently ONLY game on PC but I am willing to buy any games the group would like to play, I get along well and would love to meet some new people to game with!

I have hours and hours on many games and I am willing to help the community! I hope you consider me and thank you again for reading.

Why do you want to join?

I want to join Axiom because I've always loved gaming, playing with friends, or even making teams, to get stronger, and also have more fun. I've been a gamer for the most part of my life, since I was young, I've used to play FPS Shooter games like Crossfire, Counter-Strike and aswell other popular games. And I think that being in this group will help me being a better player, while making new friends, and getting more known to the gamer's of Hackforums. The games that I'm playing the most of my free time is Counter Strike Global Offensive and League of Legends.

Games that I'm playing

The game that I'm playing every day, is Counter Strike Global Offensive. I've got endless hours in the past weeks, and I've used a lot of money on skins and other things on the game. I'm also playing League of Legends with some of my friends.

Why should we choose you?

I think that you should accept me, because I'm an really active member, and I'm playing games every day. I'm also a really nice guy, wich loves to talk with people and make new friends. I'm also a person that you can trust. I also love to talk about games, discussing, and participating in games with the members here.

Ending words

I hope that you'll choose me, because I'm a really great guy wich is easy to get well known with. I also hope that I'll get accepted to this group, since gaming is what I live and burn for.

Thank you for reading my application.

Sincerely,
Kinguin

Exha - November 12, 2015, 11:09 am

Hey, just thought I'd apply again and see if I'm accepted.
Wanted to center the whole text but God, it's so uncomfortable to read in my opinion.

Presentation

I'm Exha, a 19 years old european gamer who spent numerous hours playing "competitive" PC games.

Grew up with casual games until 2009 when I discovered Counter-Strike: Source.

Spent around 5.000 hours playing it competitively (ESL cups, LANs...) with a bunch of friends until we decided to devote more time to League of Legends.

Played a lot during season 3 and 4 and eventually peaked at Diamond IV during season 4.

These days, I mostly play CS:GO with some friends and enjoy stomping the egocentric boosted Global Elite players.

Reasons I applied

Meeting new people to play with and discussing about various games, which is basically all I do on HF anyway these days.

Games I play

Counter-Strike: Global Offensive

League of Legends

Movie Battles II

Killing Floor 2

The Incredible Adventures of Val Helsing

Metal Gear Solid V: The Phantom Pain

Mushihimesama

Grand Theft Auto V

Sid Meier's Civilization V

Got some other popular games but I don't play much of them.

I exclusively play on PC.

Final word

Here goes my application, it's rather short but includes all I deem worthy of mentioning.

Hope I get accepted, this may be a fun experience to be a part of Axiom Reborn/2.0.

Thanks for reading it!

Do you have a mic?: Yes and it works great.

What console do you play?: I mostly play the Playstation 4, however I do have an Xbox One.. which is mostly being used as a paperweight at the moment because I don't really have any games for it.

What games do you play frequently?:

Call of Duty: Black Ops 3

Metal Gear Solid V: Phantom Pain

MLB 15 The Show

NBA 2k15

Fallout 4

Dying Light

Dragon Age: Inquisition

The Last of Us: Remastered

Madden 16

Do you have a gaming PC? If so, what are the specs?:

Motherboard: [ASUS MAXIMUS VI HERO](#)

PSU: [Rosewill Hive-750 Watt](#)

CPU: [Intel Core i7-4790K Devil's Canyon Quad-Core 4.0 GHz](#)

RAM: G.SKILL [Ripjaws X Series 8GB \(2 x 4GB\)](#)

GPU: [MSI GeForce GTX 970](#)

How many hours a day do you spend gaming?: On weekdays I probably spend around 7 or 8. On weekends I probably spend 12-15 hours,

Are you willing to play in tournaments and/or competitively with a team?: Of course. I always love

gaming with other people.

Why are you applying?: Because Axiom is amazing, and I would like a group that I could talk to people and game with them. It's not everyday that you can find a group of friendly individuals who are willing to slay some Black Ops 3 with you. I can contribute a lot, whether in the subforum or in the battlefield.

What should we expect from you?: A guy who loves to play video games with other people, and loves to talk to other people as well. I can guarantee you I possess both of those attributes. Gaming has been a passion for a very, very, long time.

Why should we accept you?: I know this doesn't mean much, but as you know I was in the previous rendition of Axiom. I was in it from the start, before the original recruitments. Anywho, I like to game, and that's what this group is all about, right? I love gaming with people, such as TJ and James. We had some pretty fun games recently on Black Ops 3 ?. I love everyone in there. Maybe some of you don't like me, and I get it.. but I like all of you. Axiom was awesome. I feel like I should be invited because I game with other people a lot, love talking to other people, and getting to know people. I don't believe applications shouldn't be judged on how many words they put into it, they should be judged on WHAT they put into it, and how they make their application.

Are you willing to spend nights participating in a group wide gaming event?: Yes I am. I am actually really really excited about this. It sounds extremely fun and I am sure it will be extremely enjoyable too. ?

P.S. Icy is a baller. So is TJ and Illuminati.

Forgot to Save as draft on my last application before the thread was junked so RIP.

Platforms I play: iOS Mobile Games, PC, Plan to get a PS4 soon.

Why should we accept you: Well, first off I meet all of the requirements and have never gotten any sort of warning level. The only time I have gotten in trouble was a -10 from Omni for misunderstanding scam report reputation rules nothing too serious in my opinion but that may result in my denial. Just wanted to say that first before you continue reading.

I would really like to be apart of Axiom because I have been gaming for about 12 years now my first console was the Game Boy Advance when I was about 4 years old. Since then I have continued gaming and changing the generation of consoles that I play on.

I have owned about 13 Consoles and currently using a laptop. I plan to do console case modding in the future as it is pretty interesting to me.

At the moment, I haven't really been active on Steam due to focusing on school work and tests because I do not want to have to take courses during the summer due to my grades being pure shit. The only thing I have been really doing is browsing HF and playing a little bit of Minecraft at the end of the day.

I have a pretty big library of games on Steam majority of them I barely play to be completely honest. My favorites by far are Arma 3 DayZ Standalone and Garry's Mod.

I also play mobile games, mostly just Clash of Clans though. Currently I am a level 79 almost maxed Town Hall 8.

When I do eventually get a PS4, I plan on getting Black Ops 3 to play zombies because it looks great especially The Giant. Also, possibly Fallout 4 because my laptop cannot handle it.

Although my school work is in the way at the moment I can promise you that I will remain active on HF and still be online on Steam. I have lots of free time during the weekends and a 3 week break in 5 weeks. Sorry for having shit reasons to be accepted but I would just like to be real with you and no bullshit.

Additional Things: My most posted gaming area is Counter-Strike but one of the recent updates fuck with my CPU and I get awful lag spikes. I do play 1.6 here and there but alot of the good servers are dead so I haven't been bothered to play it and haven't been able to play Counter-Strike in general. Games that I do play alot Arma 3, DayZ, and Minecraft do have sections in here but they are pretty dead especially Minecraft.

SIM-2263652 - November 13, 2015, 3:54 am

My name is Jelekso, I am making any essay type of an application. I am not going to make anything fancy, because the information matters more. I am a PC gamer. Originally I thought I would apply for Brotherhood, but that was for console gamers so not for me. I really feel like there should be a group that would fit for me and this seems to suit the best.

I play a lot of games, by a lot I mean you could basically say I have played almost every game. I am not going to start to list but I can assure you everything. There is however an exception and that is LoL. I never really got into it, even when I tried to get hooked multiple times. Isn't for me. Now that I think about it, I should get a life. I currently typing this on our office computer, while playing Runescape. The games I am most active are currently: Fallout 4, Runescape07 and SWTOR.

Why should you accept me is a really good question. Maybe the most important one. As you may see, I am not the most known member, nor am I the most active. But you when I post, I always aim for quality. I am a HQ gamer (at least in my own opinion). I will also state that you save the time. I haven't been to active on gaming forums. That will change also. I registered on January, 2014. Almost two years ago, and what have I accomplished? Nothing, until now. I plan to contribute and make something out of my time. Even if it's just being active and HQ. You should choose me because, I am persistent to be better.

Let's see what this application brings me.

Why do you want to join?

I want to join Axiom because I've always loved gaming. I was addicted to games since my childhood. I used to play single player games like Need for speed, Grand theft auto when I was 6-13 year old. and then I started playing online games like Counter strike 1.6 and Dota 1. I was addicted to them so much so I have stopped playing single player games permanently. Well, As a result of the addiction, I have local rank in Dota2. I don't play lots of games but I always try to master games I play.

Games that I'm playing

Dota 2

Counter Strike Global Offensive

Clash Of Clans

Why should we choose you?

Well, I am an active member in HF and also I am an active gamer. So we can discuss lots of things. We can exchange knowledge. I can help Clan matches of our members.

Ending words

I'm a friendly and active person. I like to play games and to talk about games with other people.

And I would like to meet new people and maybe participate in further community events.

Thanks for reading.

Thank you for reading my application.

I'm Cracky and I'm 17 years old from Norway. I love gaming and spend 3 - 8 hours a day playing games and talking online.

I'm mostly active in the counter strike section, but I also like playing games such as (but not limited to):

Starcraft 2, Diablo 3, Minecraft and some older classic games.

I'm mostly playing on my computer, but I do own a 3DS and a PS3/4.
I see myself as a friendly user and easy to get known to (if you try),
and if there is a game you want to play with me and I own it then there is a big chance that I would play with you.

I'm sorry for not using any fancy design,
but I read that there wasn't and set form so I hope this will be fine ?

First of all I'd like to thank you for reading my application just to warn you I'm not very good at doing applications and writing in general but I'm going to try and do my best.

General information.

Username: random person

Age: I am currently 17 years old.

Country: Canada

Time zone: UTC-08:00

My time I have spent in axiom.

When I first joined axiom in it starting days I didn't know many people there but I was welcomed by everyone. I posted regularly in the lounge but I didn't much in the gaming sub forums because to be honest it was quite dead and when you made a thread you'd only get a couple of people replying but I should of posted more to try and get it active but I didn't unfortunately. I tried posting when Black Ops 3 just came out but I didn't get many replys. My most posted section is axiom with around a third of my overall posts there. I had enjoyed talking to the group but there wasn't many gaming opportunities. That's why I'm glad to hear the gaming is now going to be the main focus of the group

which is great I have many good ideas to try and make gaming active in axiom some I have already pm'd a leader earlier about.

My current gaming platforms

I currently have:

- Xbox one (use most often)
- Playstation 3 (every so often)
- Xbox 360 (every so often)
- PC (use more for general PC stuff than gaming)
- iPhone 6

My current games

Xbox one:

- Titanfall
- GTA V
- Black ops 3 (play the most)
- Fifa 15
- Advance warfare
- And more

Xbox 360:

- A couple halo games
- COD Ghosts
- Kinect Games
- And a few other

PS3:

- GTA V
- Black ops 2
- Destiny
- And some more

PC:

- Arma 2
- Chivalry
- CS:GO
- Garry's mod
- Just Cause 1
- TF2

iPhone:

- 8 Ball Pool
- NSS
- A couple other arcade like games

Games I want and if I have the money will get

- Rainbow six siege
- FIFA 16
- Ark
- Day-z
- Fallout 4
- Dying light
- Homefront 2 the revolution

(All of these will be for Xbox one money is a bit of a problem I have a job but doesn't pay that well and will also be saving for university)

Why should you accept me?

You should accept me because I am an active member on hackforums, an active Xbox one gamer and would love to play in competitions. I would also set up torments and help in them. I would even help in torments on games I don't regularly play. I have many ideas on making the group active and have suggested some already.

How much time do I spend playing games?

I spend a lot of time playing games for example:

Black ops 3: 10 hours

TWD : 16 hours

Advanced warfare : 264 hours

Fifa 15 : 79 hours

Minecraft: 180 hours

Final note

This application took me a long time (2 hours~) and due to my lack of writing skills it may not be that good but I tried my hardest to have my point go across and hope it's good enough. I want to thank you for reading my application and have a nice day. ?

Gaming history

from since i can remember i have been a gamer, when i was like 3 - 4 my uncle brought home a ps1. the first ever video game i played was crash bandicoot 3 warped. from then on hours and hours of my life have been devoted to the are of gaming. the next gaming thing i received was a gameboy with pokemon yellow pikachu edition. i never owned a sega, n64 or dreamcast but one of my friends just had every console with lots of controllers so we could always play with all our friends. around this time i starting to get into computers, not tryna sound like a retard but the first time i ever got access to the internet i typed www.com and was so disappointed :/ thats when all the old school computer games came in like cs 1.6 and AoE then the play station 2 came out im not gonna get into details cause there were alot of classics. mean while on pc i was playing cs:s religiously. then the playstation 3 came out after a few years and i discovered cod 4, i starting playing the shit outta cod untill mw3 i just got bored of the same shit. thats when i stopped playing ps3 and got back into pc and started playing cs:go and the other games listed above :p

Platforms

Currently all i have is my ps3 and laptop :/ although my laptop is gettin old, and i cant run fallout 4 so im hoping to obtain a ps4 this december

Why should i be accepted?

I consider myself a fun an interesting person that loves gaming, i would really like to meet and play with some new people. i think this is a good opportunity to get back into hf and start giving to the community. doing things such as tutorials, giveaways and general help.

kthx

Will you be willing to participate in events/game nights: Yes if there is a game night planned or some event I will do my best to make time for it. I do however still go to school so I can't guarantee that i will always be able to participate in all the events.

Why should we accept you? I have loved games all my life regardless of what type they were I would play halo with my dad when i was 5 and then when i first got a 360 and live I was on every day. I would like to think that i was one of the best halo players back then but one day i played cod which was pretty fun for the most part but i led me to discover gmod and that let me discover steam where i play most every game I own today and have met alot of friends on it and hope to meet more as time passes along.

Games I play:

PC:

? Counter Strike: Source

? H1Z1

? GTA V

? Minecraft

Now these are the main games I play daily. I have an XB1 but I don't play it much at the moment. I do plan on getting BO3 for XB1 sometime soon.

I'm sure most of you guys have it. It would be fun to play zombies or something with everyone in future.

Some info on my gaming experience:

I started competitive gaming 4 years ago. It all started with one of the most popular console games, Call of Duty. Me and my irl friend would grind small time tournaments, Gamebattles, and pretty much anything to improve our gameplay. We tried to start multiple teams, but for some reason it just never worked out. Over some time, Call of Duty just got old for me, console gaming in general did. After all the time I had put into cod, I just wasn't enjoying it anymore. Although, I have a lot of fun memories from playing cod back in the day.

One year ago I moved onto Counter Strike. Well, I started playing competitive CS one year ago, I have been playing CS casually since 2009. Over the past year I have progressed so much. I used to only bhop and play jailbreak servers, now I have moved onto aim training, competitive matches, and much more. I play on the ESEA client a lot. I like to play pugs, 10 mans, etc and I'm always looking

for more users to play with. I follow pretty much any news about counter strike. I'm always checking the sub reddit or any other sites for any new information that is announced. I'm always trying to improve my game.

Why you should invite me to the group:

The main reason you should accept me into your group is because I'm very passionate about gaming and I could contribute a lot towards the group, whether it be how to improve, csgo trading tips, pretty much anything related to csgo. Not to mention I'm fairly active in the counter strike sub-forum. It would also be great to meet some more HF members that are interested in gaming and CS.

I was previously in the group before the "revamp" occurred. I had the opportunity to talk and play with some of the current members. I see some of them have been re-invited to group. It would be nice to be in the group and play with them again.

Also, when I was in the group I was fairly active within the group itself.

Thanks for taking the time to review my application.

Because I have been looking for a cool group to be in for a while and most groups require you to have a some type of special ability but, this group seems different. It doesn't take all that fancy gfx for me to apply. Just too much flashy shit for me you know. EDIT: Disregard the negative rep. I called a scammer for what he is and I get this. ayy lmao.

Chrome's Application

Why are you applying to Axiom?

I am applying to Axiom because I have a large interest in gaming. My whole life I have been interested in gaming and my very first console was the very first Playstation when I was a baby, After that it was a Playstation 2. I remember every day I got home and just played that to bits. I remember coming home every day and playing GTA Vice City Stories four hours and just forgetting about homework. My life goals back when I was 14 was to have a career in testing games, little did I know there was payperwork to it. And Axiom would be such a great group to be in and continue my gaming life. I believe that I would be a great member by contributing towards all of the events that Axiom host both in and out of the forums. I would love to share my ideas with the group and assist in building new fun and exciting events. I was accepted in Axiom for just over a day until I did something that had me kicked, I have sent my apology to ICY and he spread it around to the other leaders. The day that I was in Axiom I was pretty active by looking at my post activity for that one day.

Need For Speed Rivals

What is your favorite game(s)?

My all time favorite game by far is Minecraft. I have spent years enjoying this game and there is literally endless things to do on here. The creators Mojang have create the most fun and addictive game EVER! With the help of some YouTubers and Mod developers.

Do you have a mic?: Yes and it works great.

What console do you play?: I mostly play the PC, however I do have an Xbox One but it's permanently banned.

What games do you play frequently?:

League of Legends

CS:GO

Do you have a gaming PC? If so, what are the specs?:

Motherboard: [ASUS MAXIMUS VI HERO](#)

PSU: [Rosewill Hive-750 Watt](#)

CPU: [Intel Core i7-4790K Devil's Canyon Quad-Core 4.0 GHz](#)

RAM: G.SKILL [Ripjaws X Series 8GB \(2 x 4GB\)](#)

GPU: [MSI GeForce GTX 970](#)

How many hours a day do you spend gaming?: Maybe 1 hour a month.

Are you willing to play in tournaments and/or competitively with a team?: Of course. I always love gaming with other people.

Why are you applying?: Because Axiom is amazing, and I would like a group that I could talk to people and game with them. It's not everyday that you can find a group of friendly individuals who are willing to play some League of Legends with you. I can contribute a lot, whether in the subforum or in the rift.

What should we expect from you?: A guy who loves to play video games with other people, and loves to talk to other people as well. I can guarantee you I possess both of those attributes. Gaming has been a passion for a very, very, long time.

Why should we accept you?: I know this doesn't mean much, but as you know I was in the previous rendition of Axiom. I was in it from the start, before the original recruitments. Anywho, I like to game, and that's what this group is all about, right? I love gaming with people. I love everyone in there. Maybe some of you don't like me, and I get it.. but I like all of you. I feel like I should be invited because I game with other people a lot, love talking to other people, and getting to know people. I don't believe applications shouldn't be judged on how many words they put into it, they should be judged on WHAT they put into it, and how they make their application.

Are you willing to spend nights participating in a group wide gaming event?: Yes I am. I am actually really really excited about this. It sounds extremely fun and I am sure it will be extremely enjoyable too. ?

What is Axiom?:

We are trying a new method of recruitment.

Axiom is a re-brand of Instinct, which was a group dedicated towards the gaming community of Hack Forums. We enjoy getting together on Skype and Teamspeak; we also enjoy to play games with one another and to relax in the Sub-Forum together. Members have stated that Instinct, was one of the funnest groups to be a part of on Hack forums; with Axiom we wish to uphold that reputation.

Requirements:

You must be an active member of Hack Forums.

Have an passion and interest for Gaming of any kind.

You must have activity in at least in one gaming related sub-forum.

You must be active within the Axiom sub-forum if you're accepted to the group.

If you have a Warning level, it will be taken into consideration by a leader with your application.

There is no set application format, be creative and make your own. Make sure to put time & effort into your application.

Any "Half-assed" applications will be ignored.

Do not PM any of us regarding your application.

Your application will be looked over by: [Icy](#), [Red Sox](#), & [illuminati?](#)

Notes;

Originally had posted this yesterday, but we decided to take the thread down as we were planning to kick all members and restart the group (we've been planning to do this for a decent amount of time), due to the fact we felt the group wasn't going in the right direction. So here is the new recruitment thread, I hope to see a bunch of new applicants and some of the old members. Good luck to everyone that applies. Take your time when you make your application, and make sure to put effort into your application.

This will be a "Rolling Recruitment," meaning this will stay open and we will add members when we feel like we could use some fresh blood, or if we kick some members.

World of Warcraft

I hope to find some other cool members to play CSGO with and I love helping out people who are looking to learn. I just recently created a smurf just for this purpose! I'd also like to make some friends for casual gaming so we can just pick up and play whenever and it doesn't matter the game. I'm always looking to expand.

C-Only - November 19, 2015, 12:39 pm

Official application

Who am I?

My name is Joachim, a young lad from Denmark at the age of 18 and soon to be married.

I live in my own flat with my fiancée and dog, that I support completely alone, as my fiancée "Isabell", got hard times finding a job. It can be tough earning all the money while studying, but I get around it, though it does mean I get less sleep than the average human at my age.

My gaming history goes way back from playing arcade car games, to runescape and CS 1.6.

Gaming has been an enormous part of my life, as it taught me English and helped me in tough times, as I've been living with quite some troublesome "conditions" as social anxiety, depression, etc. but gaming helped me with all of that.

To make it short, gaming isn't just games for me, but a friend that always helped me out.

Gaming history.

As stated above I started way back in my young years, where runescape was a big thing for me.

Over the years I learned about Counter-strike, World of Warcraft, League of Legends, Call of Duty etc. and I loved all of the games, and never felt hatred against a certain kind of game, just like the

old "WoW vs RS" wars. That honestly made me giggle at little, as it was two very different games.

I've been jumping from every genre now and then, spending many years on browser-games too, as Habbo and Darkorbit. When saying Habbo it was back when it was a nice "chatting" site, and it was extremely popular in Denmark.

Nowadays I mainly stick to CS:GO and League of Legends, but I still tend to play everything from Real-time strategy, to diablo, Battlefield, and even minecraft.

Right now I'm waiting for my Battlefront to arrive and looking really forward to that.

My biggest problem, is that I need a "reason" or a "goal", for what I do.

Unless it is with great friends and there is fun in it, I can't force myself to play something.

That goes for LoL and CS:GO where I mainly play ranked and comp. unless someone invites me into a normal match.

Activity on HF Gaming.

When going to the gaming sections of HF, I can't say I ever got much into it.

But that doesn't mean I never posted there.

For an example when OSRS got big a few months back, I supported HF07 completely and made tons of gfx, like thread designs and signatures, for everyone who needed my help to spread the OSRS news about the HF07 clan chat.

Other than that, just like OSRS, my main way of contributing to gaming here on HF, has been making GFX for many games, including minecraft, and everyone possible way I could mentor in games I play(ed) myself.

Why pick me?

This is where I should probably get all big, but I won't.

I got no particular reason, but I dedicate myself completely to something I love, and I love gaming and would love to be apart of Axiom, and join a new gaming community, where I contribute in all ways possible.

Unfortunately GFX help to members, ain't possible currently as my work-pc broke down a couple weeks ago.

Hereby I send my application your way, and hope for the best.

As my first ever application here on HF, I hope you enjoyed the read.

Gaming related gfx work done:

Now these are the main games I play daily. I have an XB1 but I don't play it much at the moment. I do plan on getting BO3 for XB1 sometime soon.
I'm sure most of you guys have it. It would be fun to play zombies or something with everyone in future.

Some info on my gaming experience:

I started competitive gaming 4 years ago. It all started with one of the most popular console games, Call of Duty. Me and my irl friend would grind small time tournaments, Gamebattles, and pretty much anything to improve our gameplay. We tried to start multiple teams, but for some reason it just never worked out. Over some time, Call of Duty just got old for me, console gaming in general did. After all the time I had put into cod, I just wasn't enjoying it anymore. Although, I have a lot of fun memories from playing cod back in the day.

One year ago I moved onto Counter Strike. Well, I started playing competitive CS one year ago, I have been playing CS casually since 2009. Over the past year I have progressed so much. I used to only bhop and play jailbreak servers, now I have moved onto aim training, competitive matches, and much more. I play on the ESEA client a lot. I like to play pugs, 10 mans, etc and I'm always looking for more users to play with. I follow pretty much any news about counter strike. I'm always checking the sub reddit or any other sites for any new information that is announced. I'm always trying to improve my game.

Why you should invite me to the group:

The main reason you should accept me into your group is because I'm very passionate about gaming and I could contribute a lot towards the group, whether it be how to improve, csgo trading tips, pretty much anything related to csgo. Not to mention I'm fairly active in the counter strike sub-forum. It would also be great to meet some more HF members that are interested in gaming and cs.

I was previously in the group before the "revamp" occurred. I had the opportunity to talk and play with some of the current members. I see some of them have been re-invited to group. It would be nice to be in the group and play with them again.

Also, when I was in the group I was fairly active within the group itself.

Thanks for taking the time to review my application.

LogitechCamMan - November 22, 2015, 11:54 am

I've been gaming since I would have to say four years old. My first ever console was either a PS2 or a GameCube, I can't exactly remember as I would play each of them on a daily basis at least five times. My second console would had to have been the Xbox 360, back when I got it, it had just came out so it had the red ring of death issue, I got the red ring of death the second day while I was playing Call of Duty 2 (specifically the mission where you are in the snow and you have to push up in a alley way with a machine gunner shooting at you) so I think I either let it sit for years or gave it back to game stop, my third console was a PS3 (god those were some good years), a year or two after the PS3 I remember that I used to play on my mom's aspire laptop and I really enjoyed it, so she gave me that laptop for Christmas and shared our dad's laptop and I stopped playing the PS3 because I fell in love with the laptop, shortly after we moved and I played the PS3 for one more year, than that same Christmas I got my first laptop that had parts in it just meant for a overall good gaming experience. My god did I play that thing, I remember playing Battlefield 3 with my friend for over 24 hours straight, I got interrupted by my mom so I moved it in the bed and played under the cover for another 6 hours (crazy shit). Mid way that year I traded in my PS3 for a Xbox 360 to see how it would be, and the experienced sucked ass so I traded it in for money. Early of last year (maybe around August), I built my own gaming PC which lasted quite a while, and seven or six months ago I put in a Intel Core i5 4690k with a new motherboard and ram. The only console I own right now is a PS3, I mainly use it to mod but I've gotten bored of it. Currently I play Black Ops 3 on the PC, and frequently play CS:GO. I game sometimes on my phone, but it's just too cringe worthy for me honestly. I know I will be a highly active member in your group because I love to game and many members in this group love to game too.

I'm a really pashionate hardcore gamer especially in the Halo scene. I've spent countless hours of my life playing Halo, CoD, Gears, runescape etc and I love it and it is my passion! I have recently begun taking gaming to the next level by attending events within Australia to compete at the highest level. I recently attended an ACL event with other pro players from my region and took out some of the old H3 legends in my country such as 'Benno' 'Adz' and 'Codestar' On top of that I post regular Halo videos to my youtube channel nearly every week and it is my dream to start a twitch channel to entertain other gamers such as myself. (When my government decides I can have good internet :())

WHY I WANT IN:

I'm currently looking for a friendly group to play with as side-entertainment. Why not apply for Axiom and do it with other gamers? Chilling out and kicking back is my thing. I also have a beast computer to game with so just throw anything at me and I'll play if it's ok.

Why am I applying?

I'm mainly applying to meet new people online and to get back into gaming. I have a lot of spare time on my hands at the moment so now would be a great opportunity to get back into gaming.

Me, myself and I.

So about me; I'm 18 and live in the UK. I'm a chill person. I like to have fun and joke about but at times I need to be serious, I am. I get along with nearly everyone, given the chance. Outside of gaming, I'm into GFX (don't have any work present) and I thoroughly enjoy competing in motocross. Inside the gaming category, I'd class myself as a casual gamer, I'm more the one to mess around on games unless it's a competitive circumstance like when me and a friend went 2v2 on GB on MW3 a while ago. Overall, I'd say I'm averagely good on most games. I mostly enjoy playing the CoD series, Skyrim, Fallout, Destiny and the Halo series.

On the xBox One, I have all of the games listed above, apart from Fallout 4 as that's on my PC.

Budget gaming PC Specs, upgrading soon:

Spoiler ([Click to View](#))

One game in particular I have a vast knowledge on, is RuneScape. I've played RS since 2007, so I was about 10, but have been on and off throughout the years. I have a OSRS and RS3 account, I play RS3 more than I do OSRS though. I don't play any of the new gamemodes like deadman or whatever the other one is, they don't tickle my pickle.

As an 18 year old, I still do actually enjoy playing Minecraft. Not as much as Vanilla but like Tekkit and other modpacks. I like it because it adds a lot more to the game so you can't 'complete' as easily as Vanilla. I also have a lot more fun playing with modpacks because you can build great things such as working factories and automated mines. I've not long ago purchased CS:GO. It took some getting used to playing with keyboard and mouse, but I've got the gist of it and remain to have a sturdy 1:0+ K/D ratio.

The only game I have on iOS is Touchgrind Skate 2 lol.

I'm active from roughly midday onwards, if I'm not working or gone out. I find it's important to level out my social life and gaming as I got an xBox 360 at Christmas 2008, so I was 12, and totally destroyed my social life and confidence level as I played it 24/7.

Why you should consider me?

I believe I could bring a lot to this community, be it entertainment, a gaming partner/team member or a Q&A guy. Like I said in my intro; I'd like to meet some people online and have a great time gaming with them.

Thank you for taking time reading this, I hope you take me into consideration. ?

Do you have a gaming PC? If so, what are the specs?:

CPU: Intel Core i5 4690K (Yes I have an i5, don't hate)

RAM: 16gb Corsair Dominator Platinum 3000 Mhz

GPU: 2x EVGA Superclocked GTX 980 4GB

How many hours a day do you spend gaming? 2-6 hours.

Are you willing to play in tournaments and/or competitively with a team?

Yes to both, I'm happy to disappoint both myself and a group of people.

Why are you applying?

I was in this group previously and the lounge was good fun and got to play some games with a few members which was great too. Hoping to get added back in to continue my crusade.

What should we expect from you?

Periodic shitposting, consistent bottom fragging.

Why should we accept you?

Waking up to the warm caress of Avunit in the Axiom lounge... can you really resist?

Are you willing to spend nights participating in a group wide gaming event?: Yeah man, all about that.

My Most Played Game(s):

I currently play a lot of Arma 3 & CSGO where I have 620+ hours of playtime and ranking LE, just hit 350 hours on Arma 3 too.

I also enjoy playing Call of Duty's on Xbox One & also GTA.

The most played game I have is CS:GO with over 2500 hours in total spread out on my various accounts.

I tend not to get mad at the games I play, but sometimes in CS there's always the possibility to get salty, when that happens I go play Rocket League or something for a while.

I have a vast majority of games on Steam & Xbox, almost all of the main titles.

Other Games I Play:

PC:

Arma II.

Arma III.

DayZ.

Diablo 3.

H1Z1.

Rocket League.

League of Legends (Still Learning)

Counter-Strike: Global Offensive.

Counter-Strike: Source.

And a lot of other games when I am bored.

Xbox One:

Call of Duty: Black Ops III.

Battlefield 4.

Grand Theft Auto V.

FIFA 16.

Why Should You Accept Me:

I love video games and I love playing with people. Enjoying my time talking with others about the games I play, help them and get help with what I need.

I would consider myself good with communicating with others.

I would love to join Axiom because I feel like it's a group for me where I could talk about my passion, join in on the fun playing games with you all! :)

If you guys know anything about competitive console call of duty, you have heard my name before.

PM me if interested.

Stellar - December 1, 2015, 11:37 am

About me My name is Stellar and other than Graphic Design I love Gaming. I have been playing games all my life. I can remember as if it was yesterday... Wake up,"Im sick, not going to school". Parents Leave -> Then I jump on my PC and played the crap out of Counter-Strike 1.6. CS has to be my favorite game, I used to go to a computer shop near my school everyday and payed 2\$ an hour to play CS: Source because I couldn't play at home because I didn't have the game. Then I eventually got a console. Then came Call Of Duty. Man, COD4/MW2 Quickscooping kids in highrise. Gaming is life. PC master race.

Why I want to join

I think it would really cool to join this group because since I have spent all of my life around gamers, my friends are gamers. Everyone I essentially make conversation with is a gamer. Would be pretty cool to just chill in a Teamspeak and play some games and laugh about stupid stuff.

Thanks for reading, I actually put quite some thinking into this. I think this is a really cool group, ?

I really enjoy playing Counter Strike: Global Offensive, both as a competitive game, but also as a way to spend time with friends. My current rank is DMG, and I feel that's where I currently deserve to be.

Out of all the games listed here, is Osu! probably the game I've invested the most time into. I used to play with a mouse, however I upgraded to a Wacom Tablet, which yielded great results.

League Of Legends is a game I normally play with my friends. My main roles here are support and top lane. I have around 500 normal wins, which equates to ~1,000 normal games in total.

I don't really play League Of Legends competitively, but rather as a game where I can have a nice chat with some friends while doing something together.

About me

I'm 17 year old guy from Norway, who's currently attending his 2nd year in High School.

I usually escape reality through gaming whenever I'm not studying. At the moment I've only got contact with handful of people who actually play games (irl), which means playing games can be a

little lonely at times.

This group is filled to the brim with high quality and nice people, and it seems like I'd be in great company if I got to join.

I always try to give a helping hand whenever someone's in need, so I wouldn't mind teaching/helping people new to a game a thing or two about it.

I'm a quite outgoing person, and I'd love to make some new friends here.

Thanks A LOT for reading through my application! Best regards.

I have ordered an RGH console and will be way more active in the xbox 360 section doing free lobbies and services for people. I would also love to get some Game Night activities started and want the gaming sections to become more active! I will have a lot to contribute given the chance to join this group.

Hey!

So I felt like I should go for this recruitment challenge as this seems like a good group for somebody like me!

Why are you applying?

I am applying because

- 1) I'm a huge PS4 Gamer, been playing since 07
- 2) I feel like it'd be a good way to play games with other Hackforums members.
- 3) I'm friends with a few of the members already. :

List 2 contributions to HF you have made.

although I don't have any big and buzzing threads yet, I'm a new member I have helped a lot in the requests and favors section when people need help with things I'm sure a few members would vouch.

What should Axiom expect from you?

mainly COD related things I could do free 10th prestige duplications for other axiom members if that would help or I'm always available to play anything on PS4 I have plenty of games.

Why should we pick you over the other applicants?

I'm an exceptionally good gamer, I've held a 7KDR and 20 WL on Black Ops 1 and a 4KDR on MW3 with a 25 WL and a 2.5 on Bo2 with a 11 WL and somewhere in that range for ghosts and advanced warfare I'm also pretty damn good at black ops 3

Timezone : EST

iMinotaur - December 6, 2015, 2:43 am

I'm applying to Axiom because it seems like an amazing group for me to chill with some gamers in

I can bring fun and games to Axiom. I'm chill and hate drama. I'll try and calm any member down in case of drama. I've been playing games since I was 5. I was playing on my NES and having loads of fun. I like old school games and Mario was my favorite as a child. When I found out how fun playing games was, I started making games. At 1st I was having trouble. Later I actually got good and started making a lot of games. When I was 10 I made my first game.

My current favorite gaming systems are: PS4, Xbox One, Nintendo Wii U and the Nintendo 3DS. I own all of them. I currently also own an NES, PS1, PS2, PS3, Xbox, Xbox 360, Nintendo DSi, Nintendo DS Lite and Nintendo Wii. I love all of my consoles and play them all to this day.

I hope to get accepted to Axiom since I've never been in a group before and this seems perfect for me. I'd love to have my 1st group be a group where I can chill and game with people who love gaming as much as I do.

Here are 2 contributions that I've made towards HF:

[Free building for anyone in Minecraft](#)

[Free programming for anyone](#)

If I'm accepted, I'll hold private contests for Axiom every week. These can include games, gaming items etc. If I'm accepted I'll keep the activity in the Axiom sub-forum high and HQ.

Thank you for reading my application. Hope it's good enough for you guys. Oh and, I'm currently participating in the Axiom HeartStone tournament :)

Destiny is by far my most played game, it might be on par with RuneScape. I've spent a total of 2,300~ hours on it since September 2014 and I still love playing it. Loved it so much I had to buy the PS4 version of the game before I had a PS4.

[img]http://orig13.deviantart.net/75d1/f/2013/007/0/e/runescape_icon_by_drakenji-d5o6t41.png[/img]

RuneScape has always been that childhood game for me. I've been playing it since a very young age and still play it to this day. I've played during the '07 era and then when RS2 came out. Around 2011-2012 I started drifting away from RS and had no incentive of playing RS anymore. That's when 2007scape hit and got my back on it, I don't play it that often anymore due to Destiny but I get on here and there.

Minecraft is my go-to family game, whenever my cousins come over(they're kids) I would always launch up Minecraft on my PS3 or PS4 and let them play. It's a fun game when I just want to lay back and chill. I would play it solo most of the time due to me not having any friends that play Minecraft. I would say I'm a casual when it comes to Minecraft.

?man - December 13, 2015, 1:21 am

Hey guys, I guess I will start with a little bit about myself. I am a 22 year old Canadian. I recently graduated from University with a Computing Sciences degree. The reason why I wanted to go for this degree was mainly because I loved games and I wanted to create these kinds of games that I loved playing so much. I guess I could go on about my whole life story... But that would take awhile... So I will sum it up into my gaming life. I started gaming when I was quite young. The first game I really became addicted to was Runescape. This was probably around ten years ago. I then became addicted to Halo 2, which led to Halo 3, COD and now League of Legends. I guess you could say I pick one game and become addicted to it ;)

Why am I applying?

I am always posting in the various gaming forums on HF (mainly League of Legends) and I love to have discussions with other people who have the same passions that I have. I also like meeting new people and getting to know them a little bit.

Why should we accept you?

I am always on HF and I am always gaming so I contribute to the forums as much as I can. I like meeting people and having discussions about games and I would love to represent an awesome group! But, most importantly, I love games and I love talking about games with other people!

Thank you for this opportunity :)

Why I believe I should be in Axiom: As I am returning to hackforums after being afk for a long time, I want to contribute as much as possible. Along with that, I want to meet new people with similar interest, one of which being gaming! I truly believe Axiom Group is the best place to meet new people with that interest. I also believe I could help out people for example if they are stuck in a game or need someone in their party, guild, or clan. I can also help people start up their own website or forums.

Additional info about me: When people meet me, they usually describe me as a very kind, outgoing person. I definitely will make sure to apply those traits if I get into this group. [img]http://i3.minus.com/ibirYnis7E3OVg.png[/img]

BASIC INFO

Name: Meechy Darko

Age: 18

Location: USA, NJ

Gaming platforms: Mostly PS3, Gamecube for Melee, occasionally PC. Thinking about getting an X1 for Killer Instinct.

ABOUT ME I'm pretty much fresh out of high school, I'm not going to college for a while. I play video games 70% of my life, the rest I dedicate to sleep and other needless activities lmao. I build gunpla and collect action figures and other BS. And I produce music, hmu if you want a link to either of my soundclouds.

MOST PLAYED GAMES Ultra Street Fighter 4 I currently go to tournaments for this game. It's my favorite fighting game and the first one I really got serious about and it got me into the FGC. I play it on both PS3 and PC.

Under Night In-Birth: EX Late I play this game ever so often, but I'm not that good at it. It's the only anime fighter besides Aqua Pizzaz that I would put my time in because it has fewer characters and is more based in matchups and mindgames. I'm glad it's coming to Steam soon.

Ultimate Marvel vs. Capcom 3 I play this game often, but I'm horrible at it lmao. It's been out too long and the skill gap is way too high for me to try and get good, but I play it.

Street Fighter 3: Third Strike It's an old game, but I'm starting to like it more than Ultra purely because it's less BS and it moves faster. I can't wait for Street Fighter V because it's so similar to 3S

Super Smash Brothers Melee Another age old game that I still love and play a lot. Melee is such a good game to play because it's so open ended. In traditional fighters there's set combos and really only a couple ways to get around(walk, dash, walljump, teleport ect.), Melee has so many movement options and the combos aren't defined at all.

COMPETITIVE EXPERIENCE For probably the last year or so, me and my friends have all starting to get more deep into the competitive scene of games, and we even started our own team with a Fighting Game sector and FPS sector. Since I got into the scene, me and my friends have been going to almost every major fighting game tournament on the East Coast(shout out Big E) and we've been doing pretty good. My little brother got 5th place in SSBM, and my younger team member got 5th in UNIEL, both at Summer Jam 9. I myself haven't place anything note worthy purely because I'm coming in the USF4 scene super late, and there's a huge skill gap from me and a bunch of the other players, hopefully that'll change once SFV drops next year.

WHY SHOULD YOU ACCEPT ME? I love playing video games, they've been a staple in my life since I was born. I'd love to help organize events inside the group; I'm always asking people if they play fighters and go to tournaments often(you can catch me at NEC16 this weekend lol). I'd think I'd provide a challenge to many of the competitive players in the group, even in FPS if I got a good warm up. I'm really good in conversation because I have a lot of knowledge on a lot of different topics. From my application, I may seem like a fighting game only guy, but I play a bunch of different games from MMO to RPGs. Over all, I'd think I'd just be a really good member to the group.

Why should we accept you?: First off, i'm Global in CSGO, and I offer Runescape leveling services through different forums. ? I've been gaming ever since I can remember (2 years old). I'm a chill and relaxed guy who is interested in meeting new people as I have been mostly a lurker. I own a computer which can play any game so I am always up to playing games with other HF members. Gaming has been my passion for pretty much my entire life, ever since I played on a Sega Mega

drive (still have it) I've loved gaming. I'm a competitive gamer and also a casual, I am very sportsman-like as I do cheer and celebrate what my team mates achieve (i.e ace in CSGO). I'm always up for new challenges, and opportunities within the gaming community. When I have responsibilities i.e keeping active within the group sub forum, I do take this seriously. I am also active within the gaming sub forums: Runescape, and Counter Strike, as these are the two games I mostly play. I am hoping to get accepted into this group, as this will bring a whole lot more opportunities not just within gaming, but with meeting new people who share the same interest as me.

Why are you applying?

Applying because I've had a passion for gaming and still do, I love this group and the basic concept of it!

Be good at something you love to do right? I'm applying because gaming is another part of my life and forever will be.

I would love to participate in tournaments, streams, broadcasts and help out Axiom any way possible.

What multiplayer games have you played?

I go extremely way back in the day, I've played all of these games and gotten addicted to most of them for at least a year each switch games back and fourth everyday!

Counter-Strike Series
Maple Story
League of Legends
Dota Series
Smite
Dragon Nest
Call of Duty Series
Super Smash Bros Series
Halo Series
Battlefield Series
Gunbound
Wolf Team
Well of Souls
Half Life Series

Which games are you best at?

Counter-Strike Global Offensive (Global Elite - ESEA)

Maple Story (Played since version 0.36)

League of Legends (Platinum)

Dota Series (Garena days)

Call of Duty Series (MW2 was my best of the COD Series, got a nuke almost every match)

Any other hobbies or comments?

I live with my Girlfriend, she brightens my day everyday.

Other than that I'm usually programming, marketing, and playing games!

I am currently programming a Maple Story Private Server, marketing on Counter-Strike Global Offensive and browsing Hack Forums, or playing any of the best games which I am good at!

An easy going person, easy to communicate with, not shy, and an ex-streamer on Twitch planning on going back!

Please PM me if I got accepted! I am extremely looking forward to joining this group, thank you for reading Axiom Leaders.

I love this game I've gotten to level 80 before but my PS4 save data got corrupted gotten to level 50.

Haven't player this game in awhile but most likely will get back into it once I have some friends to play with inside of the group, or even outside.

I have this game on play station it's really not that bad of a game I like the concept of it.

Why I think I should be accepted:

I believe I should be accepted due to me being a fun and chill person to talk to and be around. I've been playing video games since the PS2 came out. I absolutely enjoyed it and continued adding more video games and consoles to my collection through out the year. I can't stand playing video games with people that don't communicate or talk to benefit the team. I enjoy playing with a team on CS:GO that can actually talk and communicate. I'm hoping to join Axiom to fulfill that enjoyment.

Misc:

GTA V

Why I think I should be accepted:

What I can fit into more than anything is gaming. I used to get up early in the morning when I was really young to play my gamecube, and now I absolutely love my Xbox One and PC setups. I love discussing strats and getting together to play in groups. It's tough because I had to get a new XBL account so I don't have any of my old friends to play with. I feel like I could bring a lot of insight to wherever I'm needed, and vice versa. Only point I lack is that I haven't been super active in the gaming section. Simply because I feel like the Call of Duty section doesn't meet the quality I wish it would. I would like to be, though. And I hope this team has a Skype group because I'd absolutely love to be a part of that as well. PM me if you're interested or have any questions guys. I look forward to possibly being able to join the group I've wanted to for so long!

Accept me over others because:

I have recently had a change of mindset in life. I used to sell KVs under a different alias which I will not name, but it was pretty big. I have since left the community and have decided to live life differently. To comment on my low activity, yes I do have less activity than other members applying, but watch it rise. Like I said I have changed and will be putting much more time into the HackForums community than anything else.

7. Why should we accept you?

I've been fairly around HF for a long time right now. (4 years approx.) I've been a friendly and trustful member of the community during my stay and wishing to be the same for the upcoming years as well. I've also been a hardcore gamer since a long time.

The gaming life started way back when we had the little video game console as kids when we used to play Contra, Mario, Olympics, Circus, Adventure Island, Pokemon, Ninja Turtles, Pacman and all those other epic games. <3

Gaming has been a part of my life since forever. Currently I'm fully dedicated in playing League of Legends, Counter Strike: Global Offensive. I'm well experience on league because I've been playing for four seasons and have reached a decent rank of Platinum on two different accounts I played the game on two different servers.

New to Cs:Go, learning the ways of it. But not new to FPS games though. Been playing CoD 4 for 5+ years right now. Had like 4k or 5k gaming hours on X-Fire.

8. What do you expect from Axiom?

Friendly and cool gamers to play with, have fun with and also gain and as well as share knowledge about the games we play together.

9. Anything else?

Happy New Year to all the fellow gamers out there! Happy holidays and may the gaming run through these holidays non-stop. Also, I've been hyped as fuck for 2016 because some epic games are awaiting to be released in this year. I'm sure you all are as well.

Thank you for taking the time to read my application. I hope I get a chance to be in the part of this group.
