I also just added an automatic giveaway system. I have 60 days worth of items to giveaway, and within that 60 days I'll come up with even more.

Everyday at 12PM EST you will see a new thread containing that days giveaway items.

This doesn't mean there will only be one giveaway a day, this has been added just incase I get caught up with stuff and forget to give something away.

Also there may be more downtime in a few hours, very sorry for all this.

This is still going on, it always is 24/7.

I've noticed I'm giving away 3-6 items daily.

Also since we had the downtime yesterday and a few days before I decided to giveaway way more than I normally would to make up for it.
