Thread: [Make free INTERNATIONAL calls worldwide iPhone/Laptop/Android \(100%SURVEY-FREE\)](#)

DanteStigma - November 13, 2015, 8:53 am

Hey guys, today i would like to share a quick free phone making method i use for a while but not always as sometimes it doesn't work, but mostly it should work. IT works iPhone, iPad, iPod, Android or Laptop.

This is totally spoof call, caller id is as "PRIVATE NUMBER" and can be getting safer with VPN and sockets if you're that afraid, but however calls might be recorded so be aware.

Requirements are almost none, however during this i recommend using Chrome for best compatibility, and a normal internet.

Go to <http://ievaphone.com>

Scroll down, and you will see a phone image, inside that, there will be a pile pointing down, white coloured top left side, click on that and choose the location you want to make the call to. Also it works by typing simply the country code too by yourself, but i haven't tested it yet and neither am i willing to do it (just too lazy, sorry).

Once done type in phone number (without the first 0 in your number) and then click green button. Before doing that, look if it's available to make the call, if yes, then you can talk for 3 minutes.

The guide is same for handheld devices as well so don't worry. As of Apple product users, i believe the most popular browser for your device available at your App Store should handle it.

During call, it will REQUEST microphone permission, ALLOW IT! Both on Laptop/PC and/or Handheld devices.

You can make more calls that is with couple hours between each call, but still limited to 3 minutes.

As a side-note, some countries are not working and i believe it is because those countries do get alot of calls, with excessive bandwidth usage, if so, don't get mad. Within my country it's available almost always.

Each call limited to 3 minutes, and i guess you can do another call after couple hours later, if not, you get guaranteed another call after 24 hours do pass afterall this is fully free to use.

PLEASE POST SO OTHER PEOPLE CAN SEE AND GET BENEFIT FROM THIS, BEST PART IS THIS IS SPOOF! GET VPN AND DO IT, UR SAFE! BUT I BELIEVE ALL CALLS ARE RECORDED, MISUSE OF THIS WILL I NOT HELD RESPONSIBILITY.
