Crack A Router For Username and Password

How To Crack A Router For Username and Password

(I will be using Brutus to crack a D-Link route.)

1.When we want to access our router,it will be password protected.We can try the default username and password.

Crack A Router For Username and Password

As you can see,it is password protected.

2.I will open up my Brutus.

Crack A Router For Username and Password

3.Configure Brutus.Put the target as the router's IP address.Put in the userlist and the passlist.After everything is OK,press on START.

As you can see from the picture above, Brutus is cracking the router.

4.Wait for Brutus to finish cracking the router.You will get this result.

You can see that i have get my username and password for the router.

5.Go to the page and type in the username and password

You can download this wordlist From [Here](#).

I Hope You find it Useful.

God not again... and brutus... seriously? Brutus is extremely outdated. Developers quit updating the software back in 2000. So needless to say this write up is useless.

I think SPARTA would possibly be better that or Hydra-GTK the biggest issue is what kinda login does the router have a popup like the Linksys WRT54G or a form login and some newer routers I notice have a captcha

fafri - November 15, 2015, 1:03 pm

I prefer Hydra -

if it hasn't been updated since 2000 then I doubt it will work

CoopKick - November 16, 2015, 2:35 am

Ty for this tuto, bro' ;)

Mad76e - November 16, 2015, 4:28 am

yeah.. i think i have a hydra tut.. look in my threads

code42fun - November 16, 2015, 2:12 pm

Well the tool can be 2 decades old or up to date, but if the password is wicked, both of them are equally useless...
