Thread: [\[iOS/Android\] Coding Consultants - Professional App Dev & Homework Service Company](#)

-Base- - November 14, 2015, 3:15 pm

Welcome!

Have a great app idea but have no idea how to program an Android or iPhone application? Just get some new homework from your computer science class, but have no idea what to do? That's where [the Coding Consultants](#) comes in! We are a company of developers with each employee having at least 5 years of development experience. Bringing an application to life is what we are meant to do for you. With the amount of experience we have, we are able to plan a path of development, execute that plan, and bring your application to life in the fastest time possible without losing quality.

Experience

Programming has been my hobby, life, and love ever since I began doing it 5 years ago. Over the years I have developed my skills in HTML, PHP, MySQL, Java, C#, C++, JavaScript, and Swift. Over the past three years I have developed many mobile applications, for both iPhone and Android, that I have developed personally and also for other companies. 2 applications I developed were private, closed applications used solely by the business that was paying me to develop it. Aside from those I have developed [5 public applications](#), 3 of which [I sold to a separate company](#).

Specific SkillsAndroid App Development

iPhone App Development

Homework Assignment

Server Management

Database Design & Integration

Java, Swift, PHP, HTML, MySQL, C#, C++, JavaScript, Node, Angular, Sails, Express

PricingTotal price is based on an hourly rate. The total calculated hours of development will be given to you to give an idea of the price you'll have to pay.

Pricing is very dependent on the difficulty of your application. If the application is easy it will take less time and therefore less money. If the application is more difficult it will take more time and therefore more money.

Specific prices will be given after I receive the exact details of the app you'd like to develop.

If you would only like the application developed for one mobile platform rather than both, the price will be cheaper than development for both platforms.

Process of Development For AppsAfter the app information is given to me I will tell you an

estimated time amount that the application will take to be developed.

I follow the Agile development model so each week on a specific day (dependent on what we decide together) we will meet and I will provide a "sprint". A sprint is a demonstration of the newest additions to the app since the last sprint. We will go over everything together and determine what needs to be changed and what will be worked on until the next sprint.

Following each sprint the weekly payment will need to be sent to me. The amount will be dependent on the hours worked during the week and the hourly payment discussed initially.

Graphics & Images I am not a designer and will not be providing professional graphics for the application.

If you would like to have a separate designer create the graphics I can give specific details on resolutions and I will insert the graphics for you.

Separation When the application is completely finished I will send the code to you after the final payment is made. Note that I will not send the code before the final payment.

Bugs & Extras After Development For Apps I offer 30 days of free bug fixes after development is finished. Any bugs found in this time will be fixed free of charge, and any after the 30 days will cost extra.

Any additions or extra features after development will cost extra.

Interested? If you'd like to see that million dollar idea come to life or if you'd like to get the homework assignment done ASAP, make sure you contact me! [jmrapp1270](#)

You can contact me via Skype at "Jmrapp1270" or you can message me here directly. I will be more likely to respond to Skype faster than my private messages however.

When contacting me, please make sure to have a document prepared detailing the specifics of the app. This will speed up things and make it easy for me to give you a quote.

Vouches!

egyptknight - January 16, 2016, 6:26 am

can you program a android RAT for me

-Base- - November 26, 2016, 5:36 am

Need an app developed? Send me a PM!

-Base- - December 14, 2016, 12:45 pm

Just finished off another app for a client and am open to complete more for those who are serious!

I N C R E D I B L E - December 15, 2016, 2:41 am

sent you a pm. also added you on skype.

-Base- - December 21, 2016, 8:03 am

Open for new applications!

-Base- - December 25, 2016, 10:25 am

Merry Christmas! Get your app created this holiday season!

-Base- - December 28, 2016, 9:43 am

Coding Consultants is looking to work with more clients! Let us know if you have that next million-dollar app idea and we'll get it developed for you!

-Base- - January 7, 2017, 9:44 am

Check out our new website <http://www.thecodingconsultants.com>

-Base- - January 10, 2017, 6:10 pm

Made some updates to the website. Let us know what you think!

Big vouch, very friendly and skilled, did what I wanted in good time and price :)

HeyBuddy - April 18, 2017, 3:23 pm

This user is a complete fucking retard;

spoke to him for just 15 minutes; He pulls numbers out his ass and asks \$7,500 and 4wks to code a retarded bot; While 3 other devs quoted me \$150-\$400; he then proceeds to insult me and my devs; did a little research and this kid is no more than 19; never been to school for coding; and is a complete utter fucking imbecile.

all whilst dissing my devs who have been to school; he then compares his coding skills to that of snapchats dev team;

user is a complete retard never seen someone so idiotic; after he insults me and i drop some of his cringe vids where he obviously doesn't sound like the age he's claiming to be and shows how retarded he is; he immediately blocks me.

DWC.

Well looks like your DOXing didn't go well because none of that information is true. Good luck with your "retarded bot" and thanks for bumping my thread!
