Thread: [Athena IRC \[Setup\]](#)

Stickle3 - November 15, 2015, 7:28 am

Hey, i got this source here. But i dont know how to set it up. I compiled the most but sometimes it failed and i dont know why. Can anyone help me with this please?

SimoxFX - November 15, 2015, 8:20 am

Athena is old and shit. Try gorynych diamond fox or megalodon. I can sell you diamond fox.

Nuirnxx - November 15, 2015, 8:22 am

Like the guy above me said - try Diamond Fox.

It's easy to compile and setup just read the src of the Athena Config Encrypt and the ConnectHub folder and you'll get it

You use public PMA with R0XEM's Public files to DDoS Minecraft servers with your ~50 slaves, and
then you talk shit to a new member needing help to fix an outdated irc bot..?
Smooth dude. We got a real hypocrite right here -/
