I could easily get him to install a RAT. He has a good inventory.

Hyper Beast, Cyrex, Butterfly Knife case hardened fairly blue, just don't know how to do it.

Teach me how to get it to him and take his shit and I'll happily split that knife to you and I'll take the rest (Knife is worth more than the rest of all his inventory is worth 220 dollars, not accounting for the amount of blue on the knife)

Again, if you teach me along the way how to RAT, I would greatly appreciate it.

I could get the RAT on his comp ez pz.

I really appreciate everyone reaching out to me but I had another reach out to me like 3 minutes after the post, and he's already set me up and taken off the training wheels. THanks all for your reaching out!
