Nothing proves your not a scam until you complete some orders.
But you can still scam after so many orders.

LastKiller™ - June 27, 2010, 10:40 pm

Nah lol.

I like to help people and not scam them.

I was also scammed many times so I know the feeling for people when they are scammed.

I have created many website for people and not got paid.

And everything the sounds is not true.
